Miniature Circuit Breakers

Introduction

3

Overview

Devices	Page	Application	Standards	Used in
				Non-residential buildings Residential buildings Industry
	3/3	For all 0.3 to 63 A applications with B, C and D tripping characteristics with a rated breaking capacity of 4500 A, 6000 A und 10000 A acc. to EN 60898-1.	EN 60898-1	✓ ✓ --
	3/13	For all applications from 0.3 to 125 A with a rated breaking capacity of 10000 A and 15000 A acc. to EN 60898-1. Applications for universal current from 0.3 to 63 A, Version 25 kA, acc. to EN 60947-2.	EN 60898-1/-2 EN 60947-2 UL 1077 CSA 22.2 GB 10963.1/2	-- ✓ ✓
	3/28	For socket outlet and lighting circuits in all building installations. The plug-in terminals offer easy front connection for manual insertion of conductors, which considerably reduces mounting times.	EN 60898-1	✓ ✓ --
	3/31	For socket outlet and lighting circuits in all building installations where a switchable neutral conductor is required. The miniature circuit breaker 1+N saves space in the distribution board.	EN 60898-1	✓ ✓ ✓
	3/35	Auxiliary switches, fault signal contacts, shunt trips, undervoltage releases for higher system availability, RC units for personal safety and remote controlled mechanisms for remote switching.		✓ -- ✓
	3/43	Busbars in 10 mm ² and 16 mm ² save space in the distribution board and time during mounting. Busbars in 18 mm ² and 25 mm ² acc. to UL 508 and CSA.	UL 508	✓ ✓ ✓
	3/62	Miniature circuit breakers can be used as "branch circuit protection" and are approved for the connection type "same polarity" and "opposite polarity" in the characteristics B, C and D acc. to UL489, from 0.3 to 63 A.	UL 489	✓ ✓ ✓
	3/71	Voltage-independent selective main miniature circuit breakers (SHU) in the precounter area support downstream miniature circuit breakers by providing better current limitation.	DIN VDE 0641-21	✓ ✓ --

Miniature Circuit Breakers

5SL Miniature Circuit Breakers

Introduction

3

Overview

The 5SL miniature circuit breakers are intended for use up to 6 kA/10 kA. These devices have system features that are characteristic of all Siemens miniature circuit breakers.

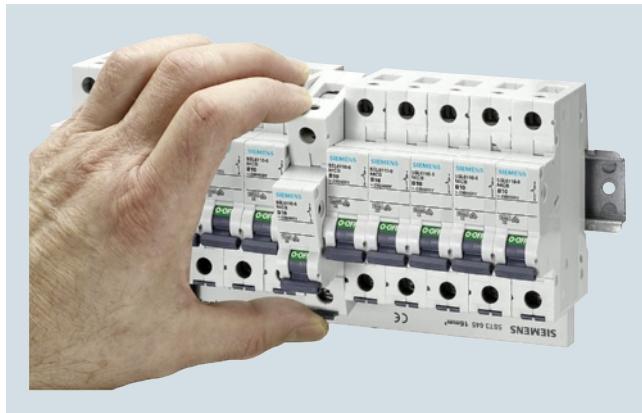

They are also suitable for the quick and easy mounting of additional components, such as auxiliary switches and fault signal contacts.

The 5SL4 miniature circuit breakers can also be combined with shunt trips, undervoltage releases and arc fault detection devices.

Benefits

- Effective touch protection when grasping and manually operating the latching slide with latch-down option.

- Individual devices can be removed from the bus-mounted assembly without the use of tools.

To facilitate cable entry, the devices are equipped with rectangular terminals for the accommodation of pin busbars with cables up to 35 mm². The rated current range is between 0.3 A and 63 A. The 5SL miniature circuit breakers are available in characteristics B, C and D.

- Easy-to-mount busbar assembly
- Consistent bus mounting concept throughout the Siemens miniature circuit breaker range.

- The 5SL miniature circuit breakers are suitable for the quick and easy mounting of arc fault detection devices, auxiliary switches, fault signal contacts, shunt trips and undervoltage releases.

Technical specifications

	5SL3	5SL6	5SL4
Standards	EN 60898-1		
Approvals	See appendix, chapter 20		
Tripping characteristic	B, C		B, C, D
Rated voltage U_n	V AC	230/400	
Operational voltage			
• Min.	V AC/DC per pole	24	
• Max.	V AC V DC/pole	250/440 60 ¹⁾	60 ^{1,2)}
Rated making and breaking capacity			
• I_{cn} acc. to IEC/EN 60898-1	kA AC	4.5	6
• I_{cu} acc. to IEC/EN 60947-2	kA AC	4.5	6
Insulation coordination			
• Rated insulation voltage	V AC	250/440	
• Pollution degree for overvoltage category		2/III	
Touch protection	Acc. to EN 50274	Yes	
Handle end position, sealable		Yes	
Degree of protection		IP20 with connected conductors IP40, in the handle range with distribution cover	
CFC and silicone-free		Yes	
Conductor cross-sections			
• 1-wire			
- Solid ($\leq 10 \text{ mm}^2$) / stranded ($\geq 16 \text{ mm}^2$)	mm 2	0.75 ... 35	
- Finely stranded with non-insulated end sleeve	mm 2	0.75 ... 25	
- Finely stranded with insulated end sleeve	mm 2	0.75 ... 25	
- Finely stranded without end sleeve	mm 2	1 ... 35	
• 2-wire, same cross-section			
- Solid ($\leq 10 \text{ mm}^2$) / stranded ($\geq 16 \text{ mm}^2$)	mm 2	0.75 ... 10	
- Finely stranded with non-insulated end sleeve	mm 2	0.75 ... 4	
- Finely stranded with insulated end sleeve	mm 2	0.75 ... 4	
- Finely stranded without end sleeve	mm 2	1 ... 4	
• 1-wire + busbar (pin thickness 1.5 mm)			
- Solid ($\leq 10 \text{ mm}^2$) / stranded ($\geq 16 \text{ mm}^2$)	mm 2	10 ... 25	
- Finely stranded with non-insulated end sleeve	mm 2	6 ... 25	
- Finely stranded with insulated end sleeve	mm 2	6 ... 16	
Terminals	±screw (Pozidriv)	2	
• Terminal tightening torque	Nm	2.5 ... 3	
Mounting position		Any	
Service life , on average, with rated load		20000 actuations	
Storage temperature	°C	-40 ... +75	
Ambient temperature	°C	-25 ... +45, occasionally +55, max. 95 % humidity	-25 ... +55, max. 95 % humidity
Resistance to climate	Acc. to IEC 60068-2-30	6 cycles	

¹⁾ The operational voltage 60 V DC/pole takes into account a battery charging voltage with a peak value of 72 V.

²⁾ Exempt: Characteristic C: 0.3 ... 1A, characteristic D: 0.3 ... 2A.

Miniature Circuit Breakers

5SL Miniature Circuit Breakers

5SL3, 4 500 A

3

Overview

The 5SL miniature circuit breakers are particularly suitable for the demands of 4.5 kA and 6 kA applications in infrastructure, such as residential buildings and small commercial buildings.

Miniature Circuit Breakers

5SY and 5SP Miniature Circuit Breakers

Introduction

Overview

MCBs are used to protect systems and installations in buildings and for industrial applications.

Used in industrial applications and plant engineering, miniature circuit breakers can be supplemented with additional components, such as auxiliary switches, fault signal contacts, shunt trips, undervoltage releases, remote controlled mechanism, RC units, and arc fault detection devices.

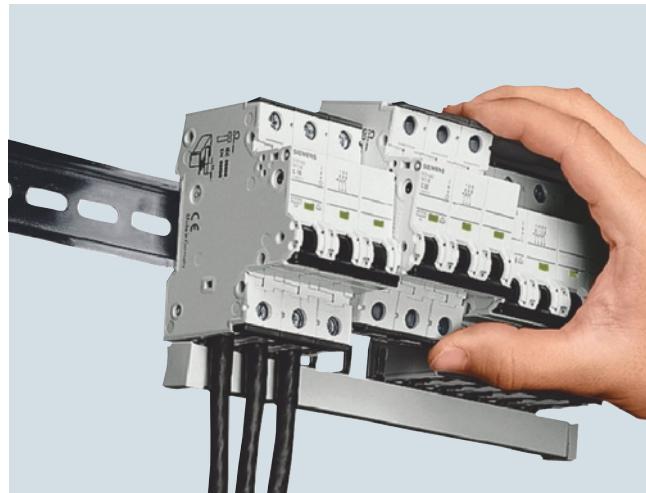

The devices are approved for worldwide use according to IEC standards for power supply systems up to 250/440 V AC. 72 V DC per pole is permitted in DC systems.

For North America, there is an additional approval according to UL 1077 for use as "supplementary protectors" in systems up to 480/277 V AC. For use in ship building, the devices also have numerous certifications according to shipping classifications; BV, DNV, GL and LRS. References to this [can be found in the appendix, chapter 20](#).

Benefits

- Optional top or bottom infeed as the terminals are identical
- Clear and visible conductor connection in front of the rear busbar facilitates controls
- The conductor is easily inserted into the terminal thanks to the large and easily accessible wiring space.

- Quick and easy manual removal of MCBs from the busbar assembly, for example if connections need to be changed
- Time-saving replacement of parts as busbars no longer need to be freed from adjacent devices.

- Double terminal chambers permit accommodation of 2 wires of different cross-sections.

- The 5SY miniature circuit breakers are ideal for the quick and easy mounting of auxiliary switches and fault signal contacts. Captive metal brackets on the additional components ensure the quick and easy mounting of devices on the miniature circuit breakers without the need for tools.

¹⁾ 1 MW (modular width) = 18 mm.**Note:**

The 5ST3600 and 5ST3630 busbars enable simple wiring of 4-pole miniature circuit breakers, [see page 3/45](#).

For application examples, [see engineering manual at:](#)
www.siemens.com/lowvoltage/manuals.

Miniature Circuit Breakers

5SJ6...-KS miniature circuit breakers, with plug-in terminals

3

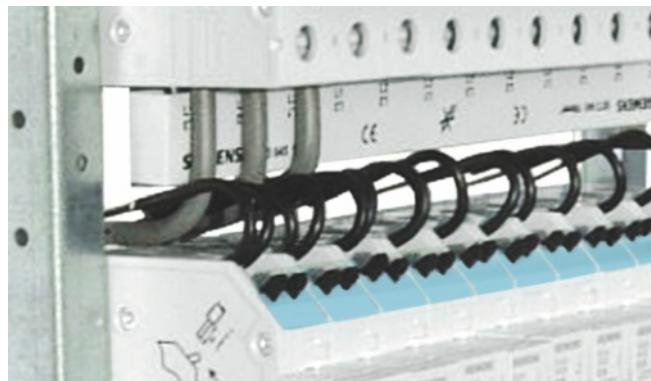

Overview

Miniature circuit breakers with plug-in terminals are used for the protection of socket outlets and lighting circuits with the most common rated currents of 10 to 20 A.

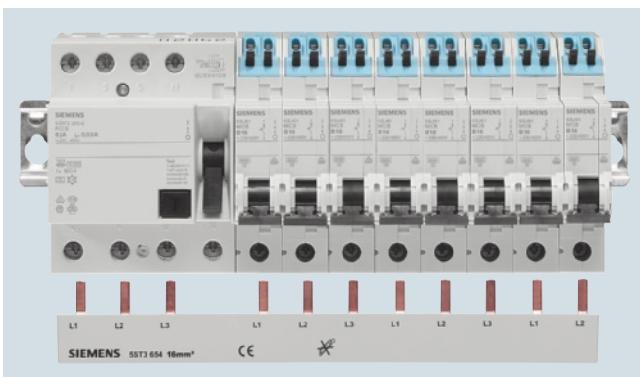

Benefits

- Double, self-contained, screwless outgoing terminals for fast connection of conductors.

- Removal of individual conductors requires no tools and ensures high operating reliability
- No end sleeves required for finely stranded conductors. This saves mounting time.

- Conventional pin busbars are used for the incoming terminal. This ensures clear, manageable and convenient access to all terminals as part of the uniform Siemens connection concept.

5SJ6...-KS miniature circuit breakers,
with plug-in terminals

Technical specifications

3

5SJ6 ...-KS			
Standards	EN 60898-1		
Approvals	See appendix, chapter 20		
Rated voltage U_n	V AC	230/400	
Operational voltage			
• Min.	V AC/DC/pole	24	
• Max.	V AC V DC/pole	250/440 60 ¹⁾	
Rated making and breaking capacity	Acc. to EN 60898-1	kA AC	6
Insulation coordination			
• Rated insulation voltage	V AC	250/440	
• Pollution degree for overvoltage category		2/III	
Touch protection	Acc. to EN 50274	Yes	
Handle end position, sealable		Yes	
Degree of protection	Acc. to EN 60529	IP20 with connected conductors, IP40 in the handle range with distribution cover	
CFC and silicone-free		Yes	
Terminals		Screwless terminals on the outgoing terminals for 1.5 ... 4 mm ²	
Conductor cross-sections			
• Top, plug-in terminals			
- Solid, stranded and finely stranded, without end sleeve	mm ²	1.5 ... 4	
- Finely stranded, with end sleeve	mm ²	1.5 ... 2.5	
• Bottom, tunnel terminal	±screw (Pozidriv)	2	
- Solid, stranded or finely stranded, with end sleeve	mm ²	0.75 ... 25	
Mounting position		Any	
Service life, on average, with rated load		20000 actuations	
Ambient temperature	°C	-25 ... +45, occasionally +55, max. 95 % humidity	
Storage temperature	°C	-40 ... +75	
Resistance to climate	Acc. to IEC 60068-2-30	6 cycles	

¹⁾ The operational voltage 60 V DC/pole takes into account a battery charging voltage with a peak value of 72 V.

Miniature Circuit Breakers

5SY Miniature Circuit Breakers, 1+N in 1 MW

Introduction

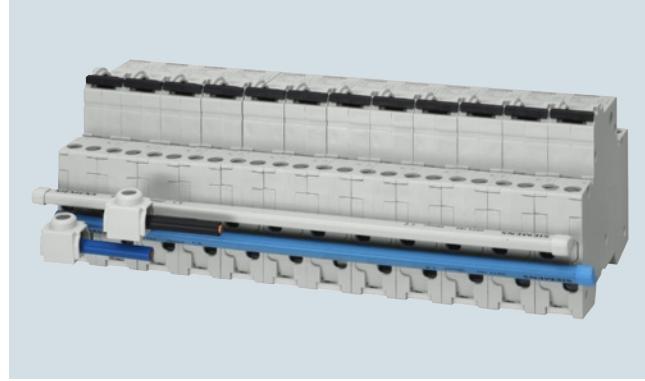

Overview

These miniature circuit breakers are used for the protection of systems and installations with switched neutral conductors in distribution boards with little space. They are just a single modular width.

Compact busbars facilitate installation in space-saving distribution boards.

3

Benefits

- Auxiliary switches and fault signal contacts from the high-capacity range can be freely mounted on these miniature circuit breakers. This increases availability and cuts down on logistics.
- The infeed can be implemented either from the top or the bottom. Additional terminals with lateral cable entry facilitate mounting when using large conductor cross-sections.

Miniature Circuit Breakers

Additional Components

Electrical components

Overview

The Siemens mounting concept supports the combination of all 5ST3 additional components with Siemens 5SY and 5SP miniature circuit breakers and with 5SU1 RCBOs.

5SL and 5SY60... miniature circuit breakers are suitable for mounting auxiliary switches and fault signal contacts. Auxiliary switches can also be mounted on 5TE8 flush-mounting circuit breakers and 5SG71 MINIZED switch disconnectors.

Auxiliary switches (AS)

The auxiliary switch (AS) always signals the contact position of the miniature circuit breaker, regardless of whether the miniature circuit breaker was tripped manually or as the result of a fault. An additional version is also available for the switching of small currents and voltages for the control of programmable control systems (PLCs) acc. to EN 61131-2. The auxiliary switch with test button enables the testing of control circuits without the need to switch the miniature circuit breaker.

Fault signal contacts (FC)

The fault signal contact (FC) signals the automatic tripping of the miniature circuit breaker in the event of a fault, such as an overload or a short circuit. If the fault signal contact is activated, the contact position does not change if the miniature circuit breaker is tripped manually. Fault signal contacts with TEST and RESET buttons enable the testing of control circuits without the need to trip the miniature circuit breaker. The red RESET button integrated in the handle also indicates the automatic tripping of the MCB. The signal can be acknowledged manually using the RESET button.

Shunt trips (ST)

Shunt trips are used for the remote tripping of miniature circuit breakers.

Undervoltage releases (UR)

Undervoltage releases are integrated (e.g. in EMERGENCY-OFF loops), thus ensuring that the MCB trips in the event of an emergency, which, in turn, ensures disconnection of the control circuit according to EN 60204. In the event that the voltage is interrupted or too low, it also trips, i.e. prevents activation of the MCB.

Remote controlled mechanisms (RC)

Remote controlled mechanisms are used for the remote ON/OFF switching of miniature circuit breakers and the remote ON switching of RC units, as well as the local manual switching of these devices. A blocking function permits maintenance work. In the event that a miniature circuit breaker or RC unit is tripped, an acknowledgment must be carried out prior to switching back on. The remote controlled mechanism has an operating mode selector switch with the functions: "Locked", "Manual" and "Remote Switching".

Selector switch position:

OFF: The remote controlled mechanism is switched off, blocked mechanically and can be sealed and/or locked.

RC OFF: Only manual operation is possible.

RC ON: Both manual and remote operation are possible.

In the event that a device is tripped by a fault (RC units, miniature circuit breakers), the handle of the basic device and remote controlled mechanism switches to the OFF position. The operator must then acknowledge the tripping by resetting the remote controlled mechanism (OFF command) before it can be reactivated. This serves the safety of the installation or to protect personnel during maintenance work.

In an RC unit/minature circuit breaker combination, the RC unit is switched on asynchronously, i.e. prior to the miniature circuit breaker. The RC units for 5SY and 5SP4 can be switched ON via the MCB handle jumper using the supplied actuator attachment. There is no need to switch off the RC unit via the remote controlled mechanism as the MCB contacts ensure disconnection of the electrical circuit.

The switching frequency is max. 2 actuations per minute. If this actuation frequency is exceeded it may cause internal tripping of the remote controlled mechanism as a protection against possible overload. In this case, the remote controlled mechanism must be switched OFF at the function selector switch and not switched back on again for at least 5 minutes. More additional 5ST3 ... components, such as AS, FC, ST and UR, can be added to the right-hand side of the remote controlled mechanism in line with the Siemens mounting concept.

RC units

RC units can be combined with miniature circuit breakers of characteristic A, B, C and D. They then form a combination of RCCB and MCB for personnel, fire and line protection. The combinations can be tailored to meet individual requirements.

For information on RC units, [please see chapter "Residual Current Protective Devices/Arc Fault Detection Devices \(AFDDs\)".](#)

Benefits

Can be universally retrofitted with all additional components

- The 5SL, 5SY and 5SP miniature circuit breakers are ideal for the quick and easy mounting of auxiliary switches and fault signal contacts.
- Captive metal brackets on the additional components ensure the quick and easy mounting of devices on the miniature circuit breakers without the need for tools.

- Fault signal contacts with TEST and RESET button enable the simple testing of auxiliary circuits and, in the event of a fault, acknowledgement of the fault over the RESET button, without the need to switch the miniature circuit breakers.

- The auxiliary switches with TEST button enable the simple manual testing of control circuits during operation of the entire installation without the need to switch the miniature circuit breakers.

More information

The Siemens mounting concept supports the combination of all 5ST3 additional components with miniature circuit breakers of the 5SY and 5SP series and RCBOs of the 5SU1 series.

5SL and 5SY60.. miniature circuit breakers are suitable for mounting auxiliary switches and fault signal contacts. Auxiliary switches can also be mounted on 5TE8 flush-mounting circuit breakers and 5SG71 MINIZED switch disconnectors.

The diagram shows which additional components can be mounted on either the right or the left.

For further information on the mounting concept for RCBOs, [see chapter, "Residual Current Protective Devices/Arc Fault Detection Devices \(AFDDs\)".](#)

5ST standard busbars

3

Overview

The busbar system with pin-type connections can be used for all 5SL6, 5SJ6...-KS and 5SY miniature circuit breakers with or without mounted auxiliary switch (AS) or fault signal contact (FC).

Busbars in 10 mm² and 16 mm² versions are available.

With bars that can be cut to length, the 5ST37 busbar system can be tailored to any requirements.

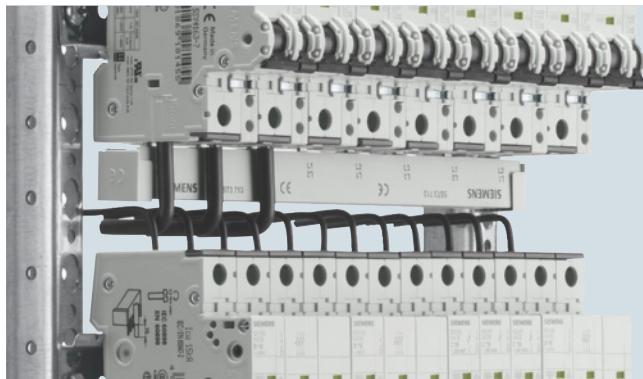

The extremely flexible 5ST36 busbar system with fixed lengths also enables installation in any length as the busbars can be overlapped.

No further need for time-consuming tasks, such as cutting, cutting to length, deburring, cleaning of cut surfaces and mounting of end caps.

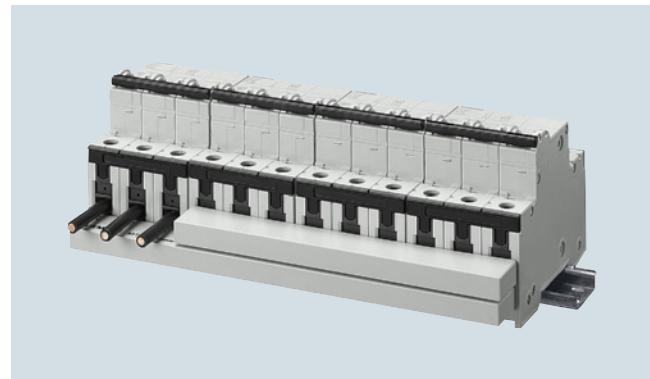

Any free pins on the busbars can be made safe by covering with touch protection.

For further information on the bus-mounting of miniature circuit breakers with residual current operated circuit breakers, please refer to the chapter "Residual Current Protective Devices/Arc Fault Detection Devices (AFDDs)".

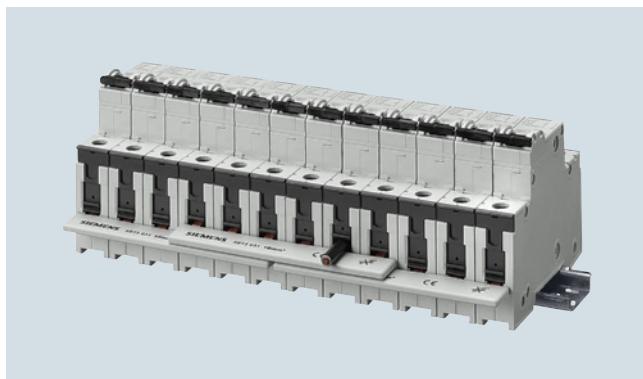

Benefits

- Between the rows of devices, the busbar, that is located at the bottom and behind the conductor, provides an optimum wiring space with easy view of the inserted conductor. This enables easy control of connections.

- The ability to overlap when mounting the busbars enables a cross-section enlargement of up to 32 mm² using the respective components, 10 mm² and 16 mm².

- By overlapping the busbars with fixed lengths, it is possible to achieve device combinations with any number of devices.

- The fact that the connection of the conductor is always clearly visible facilitates cable entry of all pole types and considerably reduces mounting times.

Technical specifications

	5ST3	
Standards	EN 60439-1 (VDE 0660-500): 2005-01	
Busbar material	SF-Cu F 24	
Partition material	Plastic, Cycloloy 3600 heat-resistant over 90 °C flame-retardant and self-extinguishing, dioxin and halogen-free	
Rated operational voltage U_c	V AC	400
Rated current I_n		
• Cross-section 10 mm ²	A	63
• Cross-section 16 mm ²	A	80
Rated impulse withstand voltage U_{imp}	kV	4
Test pulse voltage (1.2/50)	kV	6.2
Rated conditional short-circuit current I_{cc}	kA	25
Resistance to climate		
• Constant atmosphere	Acc. to DIN 50015	23/83; 40/92; 55/20
• Humid heat	Acc. to IEC 60068-2-30	28 cycles
Insulation coordination		
• Overvoltage category		III
• Pollution degree		2
Maximum busbar current I_S/phase		
• Infeed at the start of the busbar		
- Cross-section 10 mm ²	A	63
- Cross-section 16 mm ²	A	80
• Infeed at the center of the busbar		
- Cross-section 10 mm ²	A	100
- Cross-section 16 mm ²	A	130

Infeed at the start or end of the busbar

Infeed along the busbar or midpoint infeed

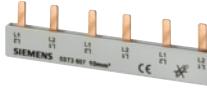

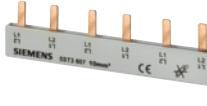

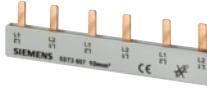

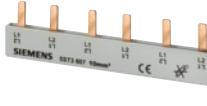

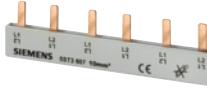

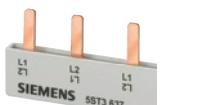

The sum of the outgoing current per branch (1, 2, 3 ... n) must not be greater than the max. busbar current I_S /phase.

Miniature Circuit Breakers

Busbars

5ST3 busbars acc. to UL 508

3

Overview

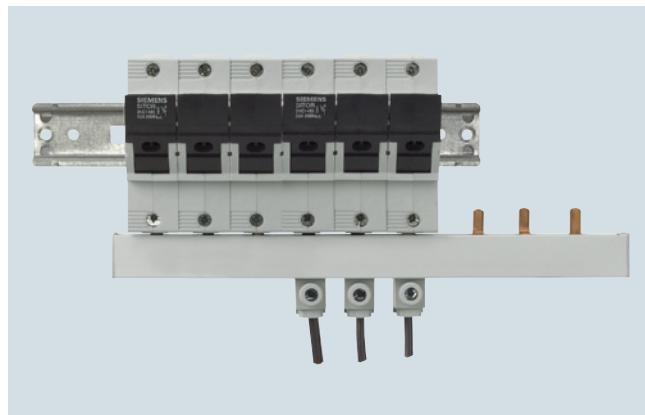

Products according to UL standards are used in North America, but also in several other countries. This is important in particular for exporting machines or electrical switchgear assemblies and equipment to the USA. Acceptance and delivery are possible only if the relevant UL standards are satisfied.

The 5ST37 busbar system according to UL 508 and CSA is suitable for both universal use worldwide with all 5SY and 5SP miniature circuit breakers for "Supplementary Protection" certified according to UL 1077 and for 3NW and 3NC fuse holders certified according to UL 512. Not approved for use in feeder circuits.

Benefits

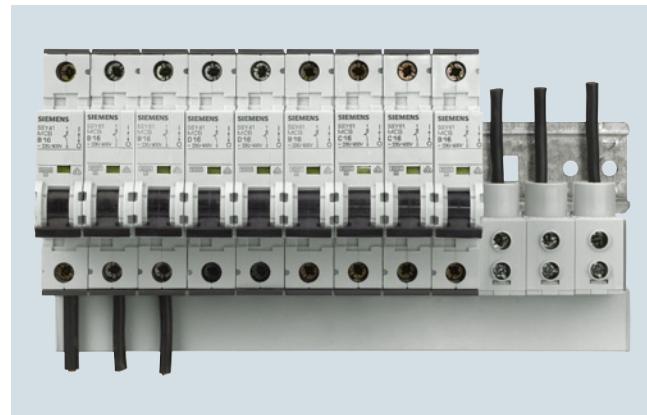

- Busbar with infeed through a connection terminal directly on the miniature circuit breaker up to a conductor cross-section of 35 mm²

- Bus mounting with infeed at the fuse holder for conductor cross-sections up to 35 mm²

The busbars are available in single-, two- and three-phase versions with different pin spacings and with two cross-sections 18 mm² and 25 mm². Infeed can be directly into the terminals of the miniature circuit breaker or through connection terminals.

The connection terminals are available in two versions – for direct infeed at the busbar or for infeed directly at the miniature circuit breaker/fuse holder. Pins that are not required can be covered with touch protection covers.

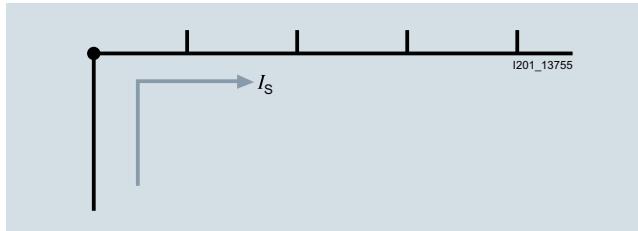

- Infeed directly on the miniature circuit breaker up to a cross-section of 35 mm² and connection terminal for connection directly on the busbar up to a conductor cross-section of 50 mm²
- Suitable for universal use according to both IEC and UL standards
- Can be used for 5SY, 5SP miniature circuit breakers and for Class CC, SITOR cylindrical and semiconductor fuse holders
- UL-tested combination – device and busbar
- Different cross-sections 18 mm² and 25 mm².

5ST2 distribution blocks

3

Overview

Distribution blocks for standard rail mounting

Using distribution blocks it is possible to implement one, two, three and four-phase systems with a rated current of up to 400 A. This allows supply terminals to be divided into several load circuits with different cable cross-sections.

The distribution blocks are made of thermoplastic with electrical and mechanical components, which enables their use under high thermal and mechanical load acc. to IEC 60947-7-1.

Miniature Circuit Breakers

Busbars

SIKclip wiring system

3

Overview

SIKclip is a fast wiring system that simplifies the connection of control switches:

- For mounting directly on the rear vertical CU busbar system
- Mounting using brackets on the rear of the DIN rail.

The 4-pole busbar can handle loads of up to 250 A, each individual contact up to 63 A.

High degree of protection because each contact is locked individually.

SIKclip is made of thermoplastic acc. to IEC 60439-3 and is suitable for high thermal loads.

For mounting on the rear of the standard mounting rail (pair)						1	2 units	020	0.032	

Note:

To install the SIKclip wiring system in the ALPHA AS, the busbars must be installed in a vertical rear position, but not recessed. If the busbars are in a recessed position the cables will not reach the circuit breakers.

* You can order this quantity or a multiple thereof.

Dimensional drawings

Miniature Circuit Breakers

5SJ4 . . . - HG miniature circuit breakers acc. to UL 489 and IEC and accessories

3

Overview

UL standards are used in North America as well as in several other countries. This is of particular importance to European exporters of electrical switchgear assemblies and equipment for machines who export to the USA, as their products will only be accepted if they meet the relevant UL standards.

A wide range of low-voltage circuit protection devices from Siemens comply with UL standards and are therefore suitable for implementation worldwide in both IEC/EN and UL applications within the framework of their specified use.

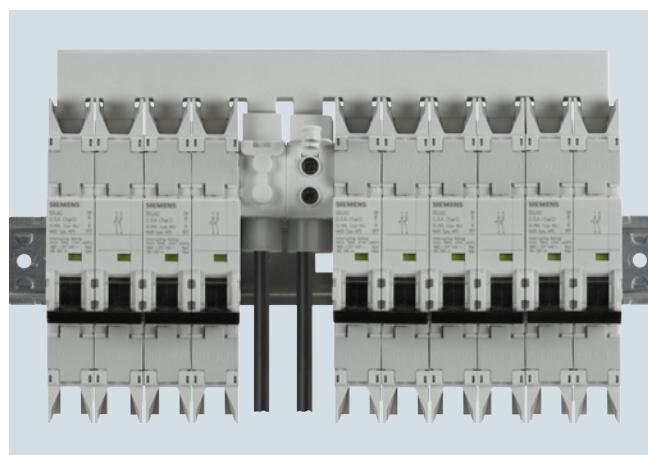

Miniature circuit breakers certified to UL 489 permit use as an all-round solution for protection tasks in distribution boards, control cabinets and control systems to UL 508A as "branch protectors". In particular, they are also approved for the protection of electrical circuits in heating, ventilating and cooling systems (HVAC), as well as for DC applications up to 60 V/125 V.

This covers a wide range of protection tasks, in residential and non-residential buildings, as well as in industry. The tripping characteristics B, C and D to EN/IEC 60898-1 have been adapted so that they fall in the permissible tripping range according to UL 489, as well as for applications at 25 °C and 40 °C.

This means that the devices are approved for use according to both standards. The enclosure dimensions of the devices correspond to DIN format. This means that the device series are suitable for universal use worldwide according to IEC or UL standards.

Benefits

- Can be used globally for all applications in residential, non-residential and industrial buildings. This facilitates the planning of installations and enhances export opportunities
- The devices can be used according to IEC/EN 60898-1 and UL 489, which means these devices can be installed anywhere in the world
- Miniature circuit breakers with 480Y/277 V up to 40 A, with 240/120 V and 240 V up to 63 A
- Can be used for both AC voltage and DC voltage up to 125 V
- Rated making and breaking capacity up to 14 kA in acc. with UL 489 and up to 15 kA in acc. with IEC 60947-2
- Fast mounting with busbars up to 115 A and feeder terminals up to 50 mm².

- Bus mounting with central infeed directly on the busbar up to conductor cross-section of 50 mm²

The key difference between the three device series is their application in different power supply systems.

- 5SJ4 . . . -HG40: 240/120 V AC, 1-pole, "same polarity only",
- 5SJ4 . . . -HG41: 240 V AC, 1-, 2- and 3-pole,
- 5SJ4 . . . -HG42: 480Y/277 V AC, 1-, 2- and 3-pole.

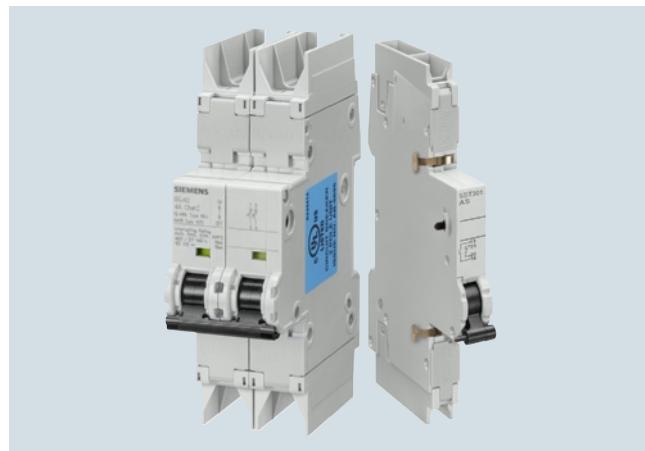

The terminals are suitable for "field wiring". This means that the devices can be installed not only in factory-built distribution boards and control cabinets, but also on-site in a customer system.

Using this mounting concept, all additional 5ST3 . . . -HG components can be combined with miniature circuit breakers of the 5SJ4 . . . -HG range. The auxiliary switch (AS) signals the contact position. In the event of a fault, the fault signal contact (FC) signals the automatic tripping of the MCB as well as the contact position. Shunt trips (ST) are used for the remote tripping of miniature circuit breakers. Captive metal brackets on the additional components ensure fast mounting on the devices.

Single, two and three-phase busbars in 3 lengths with 6, 12 or 18 pins are available as accessories for all device series for "field wiring". The infeed is via connection terminals, which are available in two versions, for direct infeed at either the busbar or the miniature circuit breakers. Pins that are not required can be covered with touch protection covers.

- Infeed direct at miniature circuit breaker for conductor cross-sections up to 35 mm²

- Accessories: Auxiliary switches, fault signal contacts and shunt trips up to 480 V can be easily mounted onto the miniature circuit breaker.

Conductor cross-sections			
• Solid and stranded, acc. to UL489 and CSA C22.2 No.5-02	AWG	14 ... 4	
• Solid and stranded, according to IEC 60898-1	mm ²	0.75 ... 35	
• Finely stranded, with end sleeve	mm ²	0.75 ... 25	
Mains connection		Any	
Mounting position		Any	
Service life, on average, with rated load		20000 actuations	
EMC environment			
• Acc. to EN 60947-2		Suitable for environment "B" (immunity to interference not applicable)	
Ambient temperature	°C	-25 ... +55, max. 95 % humidity	
Storage temperature	°C	-40 ... +75	
Resistance to climate acc. to IEC 60068-2-30		6 cycles	
Resistance to vibrations acc. to IEC 60068-2-6	m/s ²	50 at 25 ... 150 Hz and 60 at 35 Hz (4 sec)	

¹⁾ For detailed information on the rated making and breaking capacity, see engineering manual at: www.siemens.com/lowvoltage/manual.

Miniature Circuit Breakers

5SJ4 . . . - HG miniature circuit breakers acc. to UL 489 and IEC and accessories

3

Version	Busbars		Terminals	
Type	5ST3663-HG		5ST3666-0HG	
Standards	UL 489; UL File No. E321559			
Operational voltage	V AC	690		
• Acc. to IEC	V AC	480 V (60z)		
• Acc. to UL 489				
Rated conditional short-circuit current	kA	15 (with NH3 355 A gL/gG 500 V)		
• Dielectric strength	kV/mm	30		
• Surge strength	kV	> 9.5		
Rated current at 40 °C ambient temperature	A	115	115 (Cu 75 °C) 95 (Cu 60 °C)	115 (Cu 75 °C) 110 (Cu 60 °C)
Insulation coordination		2		
• Pollution degree		III		
• Overvoltage category				
Busbar cross-section (Cu)	mm ²	16		
Infeed	Any			
Conductor cross-sections				
• AWG cables	AWG	--	14 ... 2	14 ... 1
• Solid and stranded	mm ²	--	1.5 ... 35	1.5 ... 50
Terminals		--	6 mm Allen key	±screw (Pozidriv) 2
• Terminal tightening torque	Nm	--	3.3	3.3
	lb.in	--	30	30
Temperature resistance	°C	200 – UL 94-V0/0.4 mm		
Interrupting rating	10 kA at 240 V AC or 480 V AC			

Note:

The busbars and terminals are suitable for applications up to 80 A if installed in distribution boards with min. dimensions of 18 x 18 x 6.25", or up to 115 A if installed in distribution boards with min. dimensions of 30 x 30 x 10".

Mounting concept for mounting 5ST30..-0HG accessories on
5SJ4 . . . - HG miniature circuit breakers

The diagram shows which additional components can be mounted on the right.

SHU 5SP3 main miniature circuit breakers

Overview

Selective main miniature circuit breakers are used as circuit breakers at meter panels and provide an optimum solution.

Characteristic E is adapted to the special application requirements for cascade circuits between melting fuses and miniature circuit breakers in distributor circuits.

An integrated adapter enables quick and easy mounting of the devices on 40 mm busbars. The reduced width of 1.5 MW creates lots of additional space in the meter cabinet.

The screwless outgoing terminal provides optimum user-friendliness.

Used in conjunction with the downstream miniature circuit breaker, selective main miniature circuit breakers ensure effective protection and optimum availability of the system.

Benefits

- Quick and easy installation as can be snapped directly onto busbar
- Space-saving field installation due to reduced mounting width
- Tool-free connection of meter cable
- Reliable and high selectivity
- Optimum availability of customer system
- Voltage-independent operation of selective main miniature circuit breakers
- Practical locking options
- The selective main miniature circuit breakers support downstream miniature circuit breakers by providing excellent current limitation, thus enhancing system protection
- High and safe selectivity between sub-distribution and meter panel ensures the continued supply of the unaffected circuits in the event of a fault, thus improving system availability
- The selective main miniature circuit breaker prevents the affected circuit from being reconnected until the fault is eliminated. Greater safety during operation
- No previous knowledge required for operation of the selective main miniature circuit breakers. This ensures fast and safe disconnection and reconnection of loads.
- Complies with all the requirements of TAB 2007.

Technical specifications

	5SP37.., 5SP37..-1	5SP37..-2, 5SP37..-2KK0.	5SP38..-2
Standards	DIN VDE 0645	DIN VDE 0641-21	
Rated voltage U_n			
• 1-pole	V AC	230/400	--
• 3 x 1-pole	V AC	400	400
Operational voltage	Min. Max.	V AC V AC	110 440
Rated frequency		Hz	50 ... 60
Rated current I_n		A	16 ... 100 16 ... 63
Rated insulation voltage U_i		V AC	690
Rated making and breaking capacity I_{cn}		A	25000
Insulation coordination			
• Overvoltage category		IV	
• Pollution degree		3	
Surge strength U_{imp}	kV	6	
Impact resistance			30 g, at least 3 impacts, impact duration 11 ms
Resistance to vibrations			2 g, 20 frequency cycles 5 ... 150 ... 15 Hz
Switching position indication			OFF = green, ON = red
Main switch characteristics	Acc. to EN 60204-1	Yes	
Handle end position, sealable		Yes	
Cutoff	ON/OFF	--	Locking slide with lock, additional wire seal, cable ties and Antilux
Device depth	mm	92	
Degree of protection		IP20, with connected conductors	
Mains connection		Any	
Mounting position		Any	
Mounting		On standard mounting rail or interface adapter	Direct tool-free mounting on the busbar system
Service life, on average, with rated load	Actuations	20000	
Wire connections		Saddle terminals at both ends	
• Top			Screwless spring terminal for flexible cables, in particular for meter connecting cables acc. to DIN 43870-3
• Bottom			Box terminal, also for infeed to the busbar system, up to 100 A infeed current
