

# D2T

Miniature Power/Door Switch

## Door Switch Incorporated with Two Circuits for Power Loads and Micro Loads.

- Compact size, with two separate circuits for power and signals.
- Panel- or screw-mounted with ease.

RoHS Compliant

## Model Number Legend

D2T- 1 T 2

### 1. Actuator

None : Pin plunger  
L : Hinge lever

### 2. Terminals

None : Solder terminals (Right-angled)  
S : Solder terminals (Straight)

## List of Models

| Actuator    | Terminals                                                                           | Right-angled | Straight |
|-------------|-------------------------------------------------------------------------------------|--------------|----------|
| Pin plunger |  | D2T-T1       | D2T-T1S  |
| Hinge lever |  | D2T-LT1      | D2T-LT1S |

## Contact Form

- DPST-NO model

## Contact Specifications

| Item                                      |                      | Contact | Between terminals 1 and 2 | Between terminals 3 and 4 |
|-------------------------------------------|----------------------|---------|---------------------------|---------------------------|
| Contact                                   | Specification        |         | Rivet                     | Plated                    |
|                                           | Material             |         | Silver                    |                           |
|                                           | Gap (standard value) |         | 1 mm                      | 1.4 mm                    |
| Inrush current                            |                      |         | 60 A max.                 | -                         |
| Minimum applicable load (reference value) |                      |         | 160 mA at 5 VDC           | 1 mA at 5 VDC             |

## Ratings

| Terminal                  | Rated voltage | Resistive load |
|---------------------------|---------------|----------------|
| Between terminals 1 and 2 | 250 VAC       | 5 A            |
| Between terminals 3 and 4 | 125 VAC       | 0.1 A          |

Note. The above rating values apply under the following test conditions.

- (1) Ambient temperature: 20±2°C
- (2) Ambient humidity: 65±5%
- (3) Operating frequency: 30 operations/min

## Approved Safety Standards

UL (UL1054)/CSA (CSA C22.2 No.55)

| Rated voltage | Terminals 1 and 2 | Terminals 3 and 4 |
|---------------|-------------------|-------------------|
| 125 VAC       | 5 A               | 0.1 A             |
| 250 VAC       | 5 A               | -                 |

VDE (EN61058-1)

| Rated voltage | Terminals 1 and 2 | Terminals 3 and 4 |
|---------------|-------------------|-------------------|
| 125 VAC       | -                 | 0.1 A             |
| 250 VAC       | 5 A               | -                 |

Testing conditions: 5E4 (50,000 operations) T85 (0°C to 85°C)

Characteristics

|                                             |                                                             |                                                                                   |
|---------------------------------------------|-------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Permissible operating speed                 |                                                             | 10 mm to 500 m/s (for pin plunger models)                                         |
| Permissible operating frequency             | Mechanical                                                  | 120 operations/min                                                                |
|                                             | Electrical                                                  | 30 operations/min                                                                 |
| Insulation resistance                       |                                                             | 100 MΩ min. (at 500 VDC with insulation tester)                                   |
| Contact resistance (initial value)          |                                                             | Between terminals: 1 and 2: 50 mΩ max.<br>Between terminals: 3 and 4: 100 mΩ max. |
| Dielectric strength                         | Between terminals of the same polarity                      | 1,000 VAC 50/60 Hz for 1 min                                                      |
|                                             | Between current-carrying metal parts and ground             | 1,500 VAC 50/60 Hz for 1 min                                                      |
|                                             | Between each terminals and non-current-carrying metal parts | 1,500 VAC 50/60 Hz for 1 min                                                      |
|                                             | Between terminals of different polarity                     | 1,500 VAC 50/60 Hz for 1 min                                                      |
| Vibration resistance *1                     | Malfunction                                                 | 10 to 55 Hz, 1.5 mm double amplitude                                              |
| Shock resistance                            | Destruction                                                 | 1,000 m/s <sup>2</sup> (approx. 100G) max.                                        |
|                                             | Malfunction *1                                              | 300 m/s <sup>2</sup> (approx. 30G) max.                                           |
| Durability *2                               | Mechanical                                                  | 100,000 operations min. (60 operations/min)                                       |
|                                             | Electrical                                                  | 100,000 operations min. (30 operations/min)                                       |
| Degree of protection                        |                                                             | IEC IP40                                                                          |
| Degree of protection against electric shock |                                                             | Class I                                                                           |
| Proof tracking index (PTI)                  |                                                             | 175                                                                               |
| Ambient operating temperature               |                                                             | -25°C to +85°C at ambient humidity of 60% max. (with no icing or condensation)    |
| Ambient operating humidity                  |                                                             | 85% max. (for +5°C to +35°C)                                                      |
| Weight                                      |                                                             | Approx. 10g (pin plunger models)                                                  |

Note. The data given above are initial values.  
\*1. The values are at Free Position and Total Travel Position values for pin plunger, and Total Travel Position value for lever. Close or open circuit of the contact is 1 ms max.  
\*2. For testing conditions, consult your OMRON sales representative.

Mounting Holes (Unit: mm)

Dimensions (Unit: mm) and Operating Characteristics

The illustrations and drawings are for right-angled terminals. Straight terminals are omitted.

●Pin Plunger Models

D2T-T1

D2T-T1S

| Operating Characteristics |     | Model | D2T-T1<br>D2T-T1S |
|---------------------------|-----|-------|-------------------|
| Operating Force           | OF  | Max.  | 3.24 N {330 gf}   |
| Releasing Force           | RF  | Min.  | 0.5 N {50 gf}     |
| Total Travel Force        | TTF | Max.  | 6.37 N {650 gf}   |
| Overtravel                | OT  | Min.  | 0.8 mm            |
| Operating Position        | OP  | *     | 4.4±0.6 mm*       |

\* Operating sequence of the circuit between terminals 1 and 2 and the circuit between terminals 3 and 4 is not specified.

●Hinge Lever Models

D2T-LT1

D2T-LT1S

| Operating Characteristics |     | Model | D2T-LT1<br>D2T-LT1S |
|---------------------------|-----|-------|---------------------|
| Operating Force           | OF  | Max.  | 1.47 N {150 gf}     |
| Releasing Force           | RF  | Min.  | 0.20 N {20 gf}      |
| Total Travel Force        | TTF | Max.  | 2.45 N {250 gf}     |
| Overtravel                | OT  | Min.  | 1.6 mm              |
| Free Position             | FP  | Max.  | 10.1 mm             |
| Operating Position        | OP  | *     | 6.9±1.3 mm          |
| Releasing Position        | RP  | Max.  | 9.5 mm              |
| Total Travel Position     | TTP | Max.  | 3.6 mm              |

\* Operating sequence of the circuit between terminals 1 and 2 and the circuit between terminals 3 and 4 is not specified.

Note 1. Unless otherwise specified, a tolerance of ±0.15 mm applies to all dimensions.  
Note 2. The operating characteristics are for operation in the A direction (↓)

## Precautions

★ Please refer to "Basic Switches Common Precautions" for correct use.

### Correct Use

#### ●Mounting

- Apply operation force to the pin plunger in the direction it operates. Applying forces laterally or from an oblique direction may damage the pin plunger.

- Use M3 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.39 to 0.59 N·m {4 to 6 kgf·cm}.

#### ●Soldering

- Terminal connection

When soldering the lead wire to the terminal, first insert the lead wire conductor through the terminal hole and then conduct soldering.

Complete the soldering at the iron tip temperature not exceeding 350°C within 3 seconds, and do not apply any external force for 1 minute after soldering. Soldering at an excessively high temperature or soldering for more than 3 s may deteriorate the characteristics of the Switch.

• Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.  
• Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

**Note: Do not use this document to operate the Unit.**
