# Direct Ring Light/Low Angle Ring Light FLV-DR Series/-DL Series

Select Lighting that fits your workpieces with a variety of illumination angles.

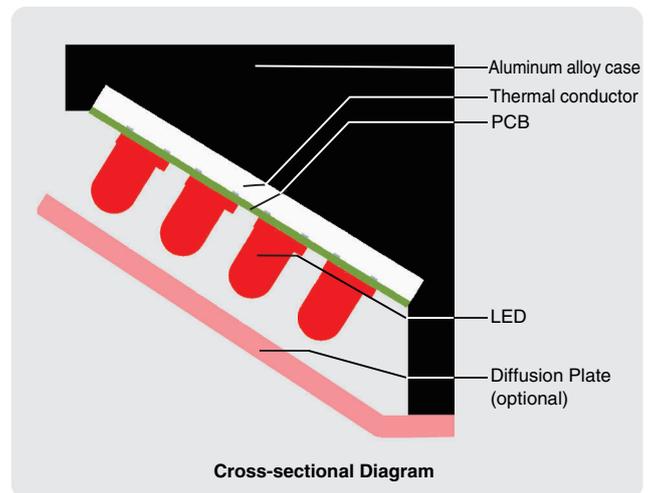

## Product Features

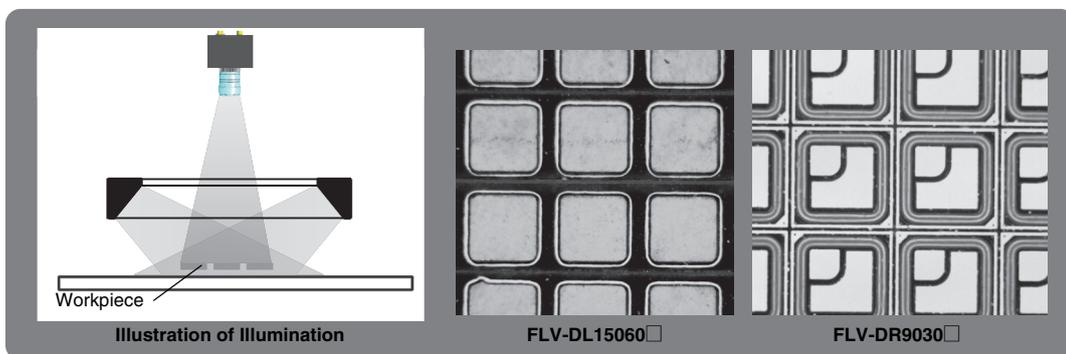

- Bright illumination with high-density LED arrays.
- Compact designs that save installation space.
- Optional Diffusion Plates for uniform illumination.

## Applications

- Detection of PCBs
- Detection of IC components
- Microscope illumination
- Detection of plastic containers
- Inspection of printing on ICs
- Standard exterior detection, character recognition, and code reading

\*: This figure is a conceptual illustration and may vary from the actual structure.

\*1: The table shows whether each Light can be connected to Lighting Controllers. When multiple Lights are connected to a Lighting Controller, make sure that the total power consumption of all connected Lights does not exceed the power consumption of connectable Light of each Lighting Controller.

- : Connectable. Light can be continuously powered.
- : Connectable. Light can be powered only while the trigger is input.
- X: Not connectable

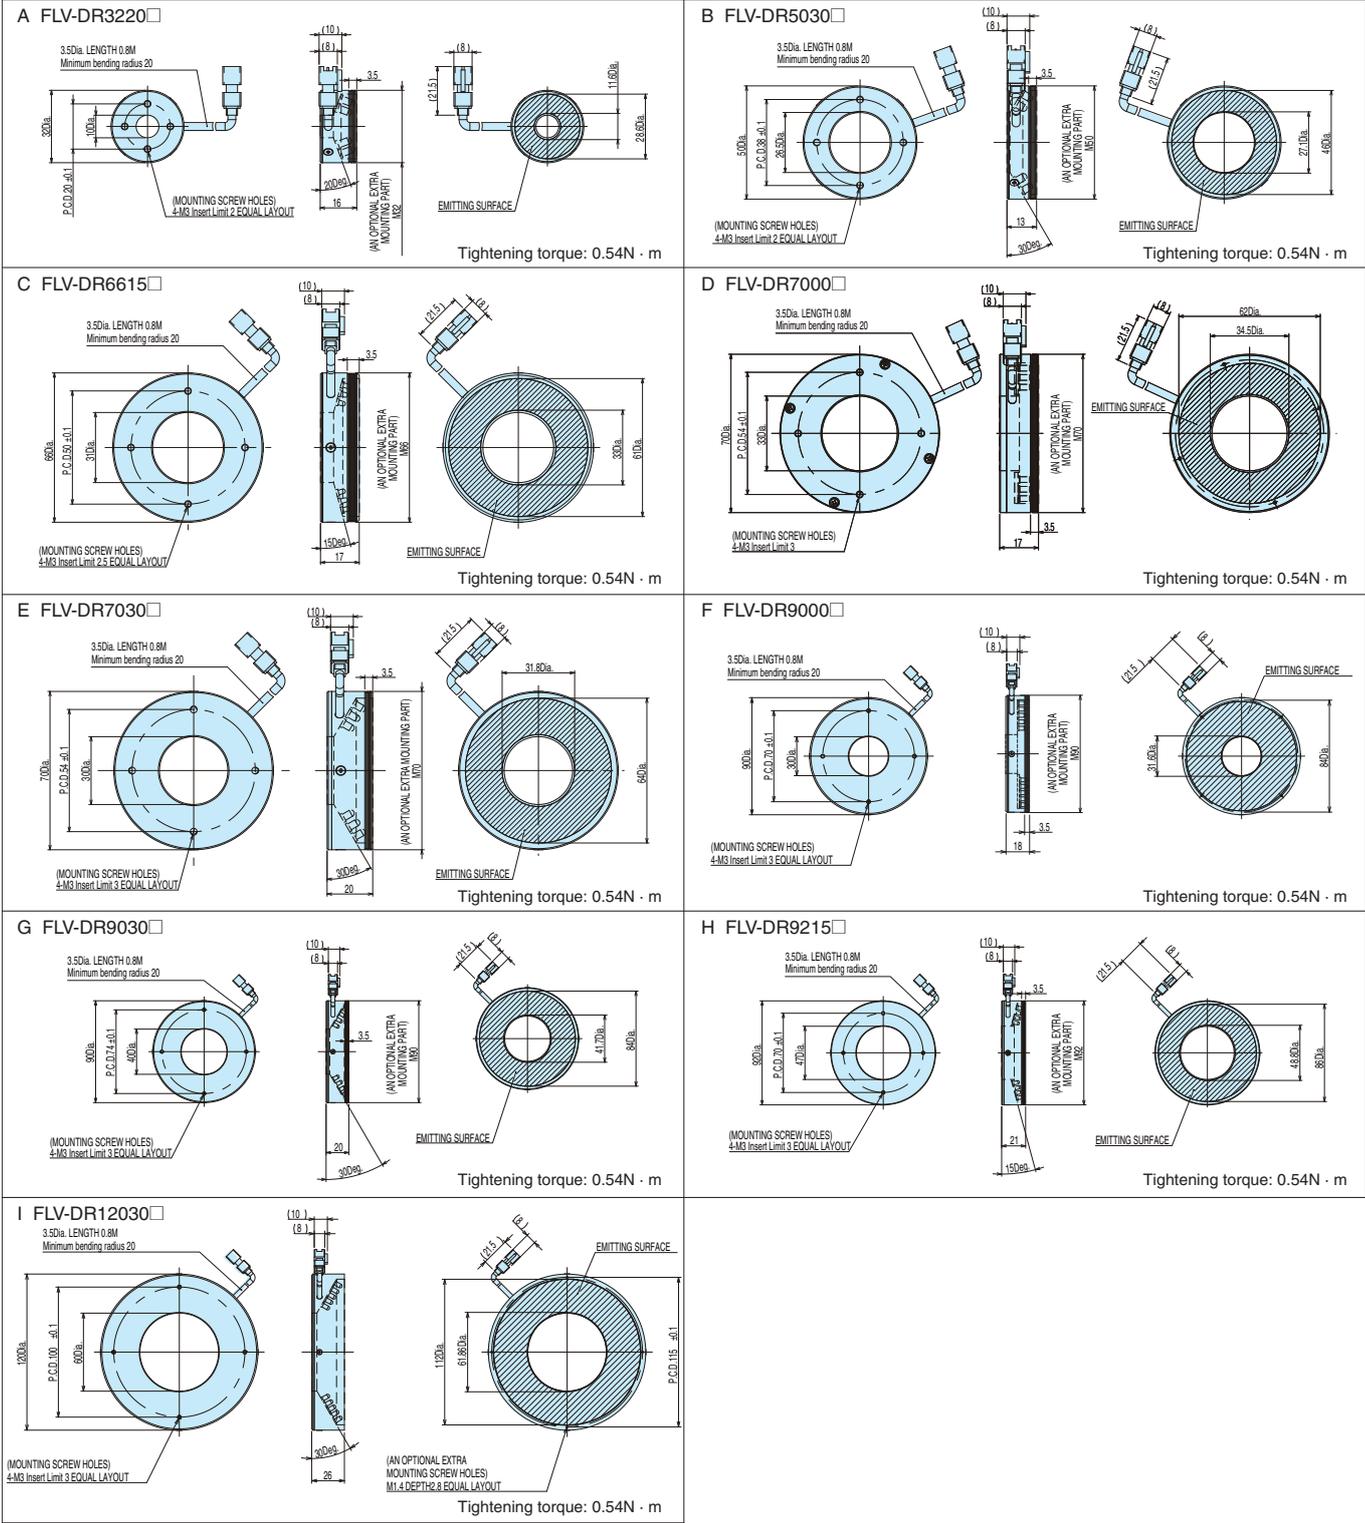

\*2: If the Lighting requires more than 7.5 W of total power, an external power supply to the FLV-TCC is required.

Note: Refer to page 62 for LED safety information.

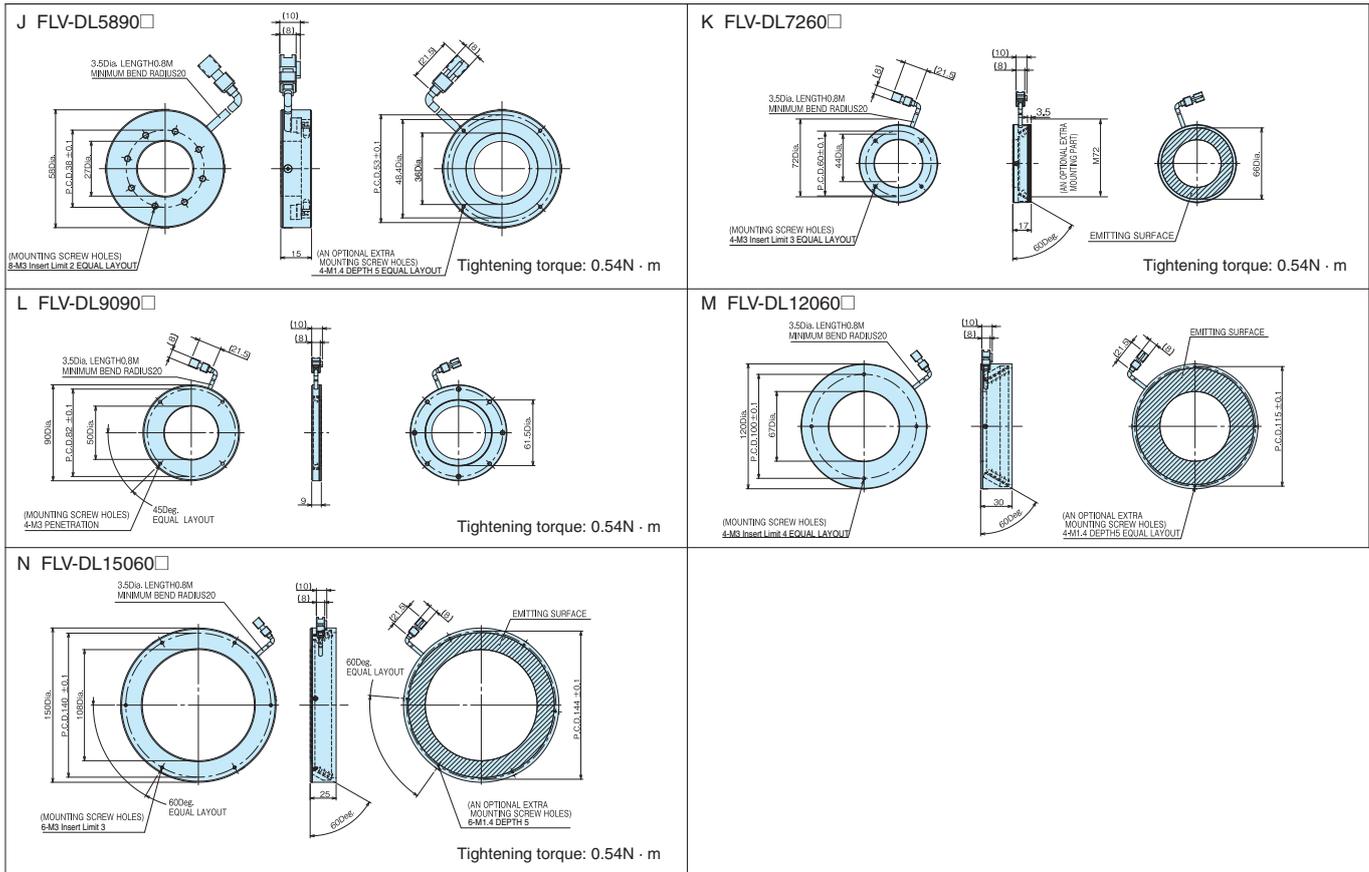

# Direct Ring Light/Low Angle Ring Light FLV-DR Series/-DL Series

## Dimensions (Unit: mm)

### ●Direct Ring Light

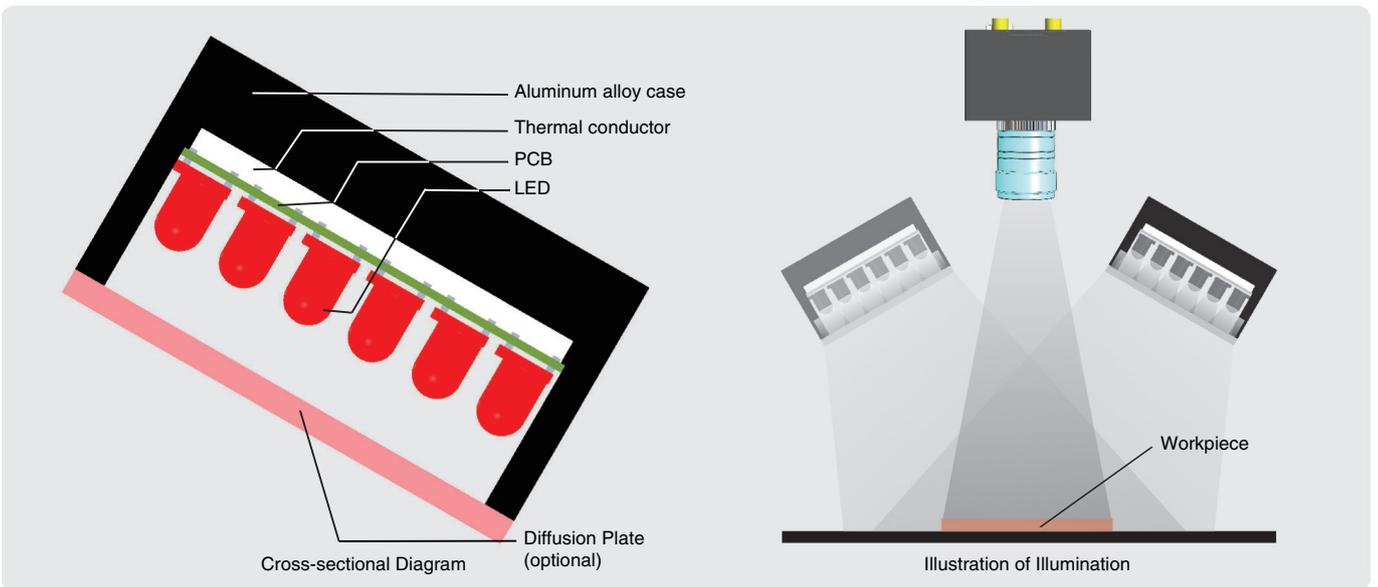

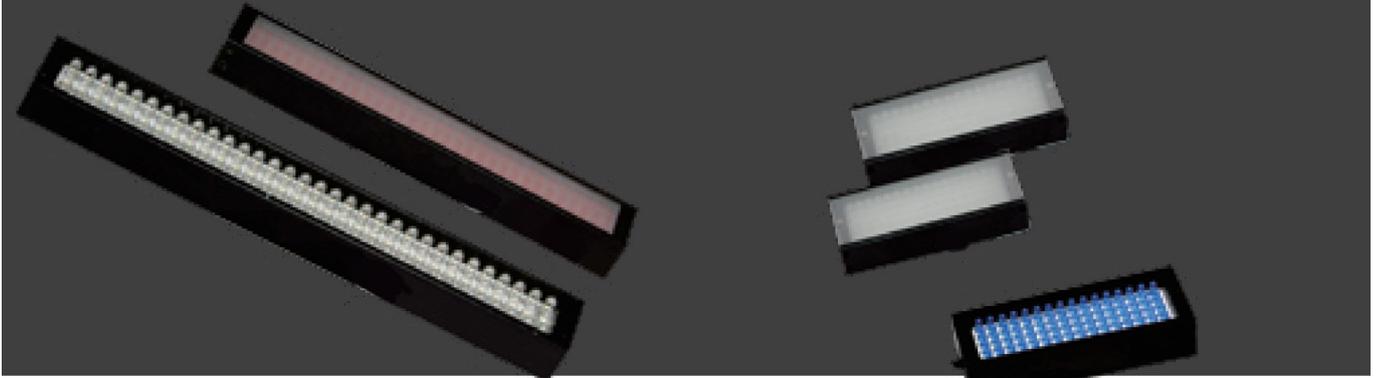

● Low Angle Ring Light

# Bar Light FLV-BR Series

Many color and size variations are available to uniformly illuminate wide surfaces.

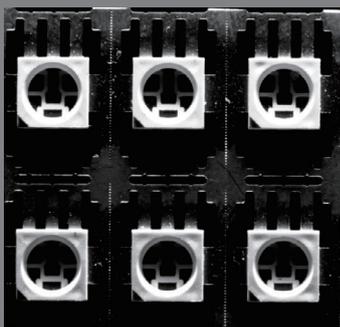

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

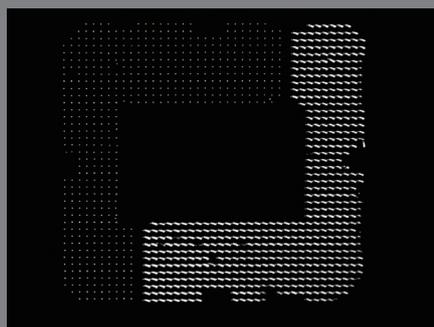

- Ideal for illumination of wide, rectangular surfaces.
- Many color and size variations.

## Applications

- Detection of metal surfaces
- Image scanning
- Detection of cracks on surfaces
- Detection of LCD panels

Positioning of LED Packages

Detection of Faulty LGA Electrodes

Detection of Printed Logo Marks and Characters on Long Workpieces

\*1: The table shows whether each Light can be connected to Lighting Controllers. When multiple Lights are connected to a Lighting Controller, make sure that the total power consumption of all connected Lights does not exceed the power consumption of connectable Light of each Lighting Controller.

◎: Connectable. Light can be continuously powered.

○: Connectable. Light can be powered only while the trigger is input.

×: Not connectable

\*2: If the Lighting requires more than 7.5 W of total power, an external power supply to the FLV-TCC is required.

\*3: There are different model numbers for different polarization directions.

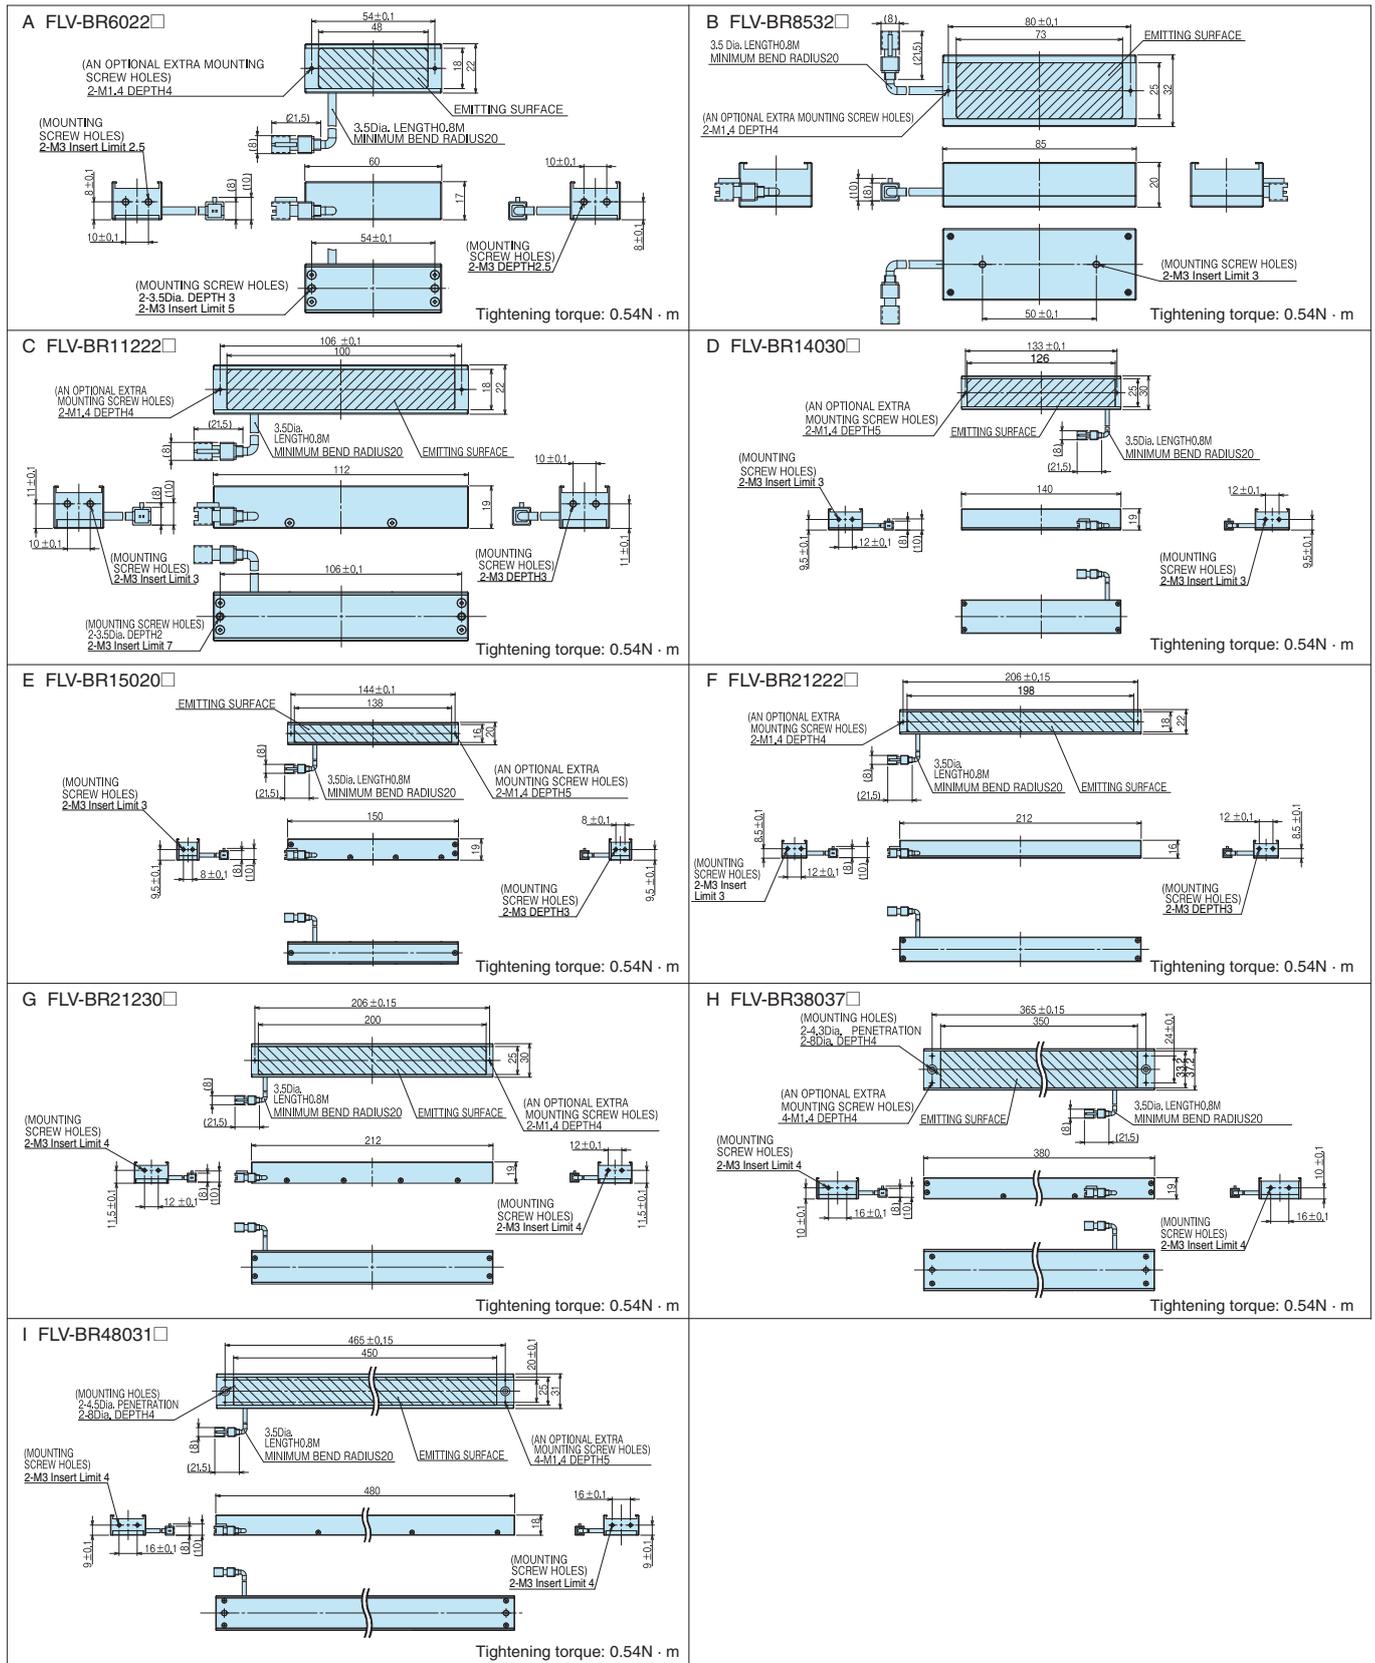

Polarization along the short direction: The model numbers have a “-V” suffix. (Example: FLV-BR□□□□□PL-V)

Polarization along the long direction: The model numbers do not have a “-V” suffix. (Example: FLV-BR□□□□□PL)

Note: Refer to page 62 for LED safety information.

# Bar Light FLV-BR Series

## Dimensions (Unit: mm)

# Coaxial Light FLV-CL Series

Coaxial illumination with the Lens helps prevent interference from reflected light. This series is ideal for surface damage and character inspections on highly reflective workpieces with mirror-like surfaces.

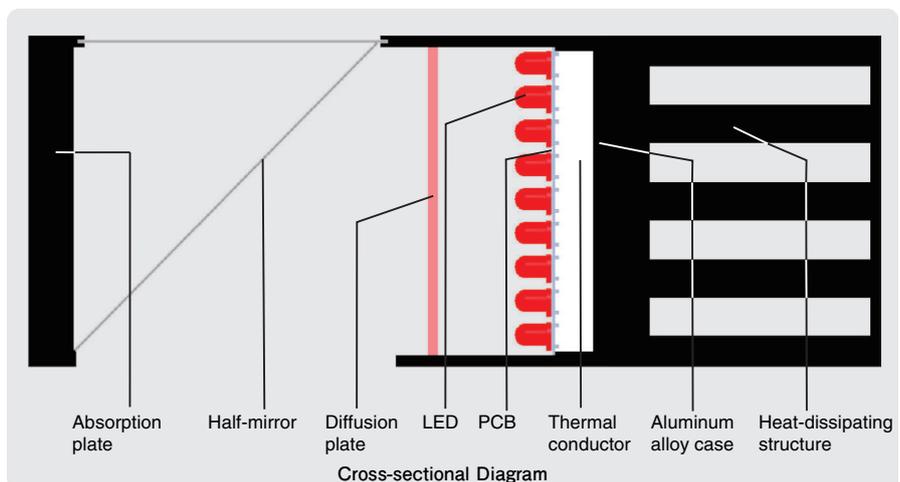

## Product Features

- Long life and stability result from a structure with optimum heat dissipation.
- Uniform illumination for clear images.

## Applications

- Inspection for scratches on highly reflective surfaces
- Inspection for damages on chips and silicon wafers
- Detection of positioning marks
- Recognition of bar codes on packages
- Recognition of laser-marked characters and 2D DMP codes
- General exterior detection

\*: This figure is a conceptual illustration and may vary from the actual structure.

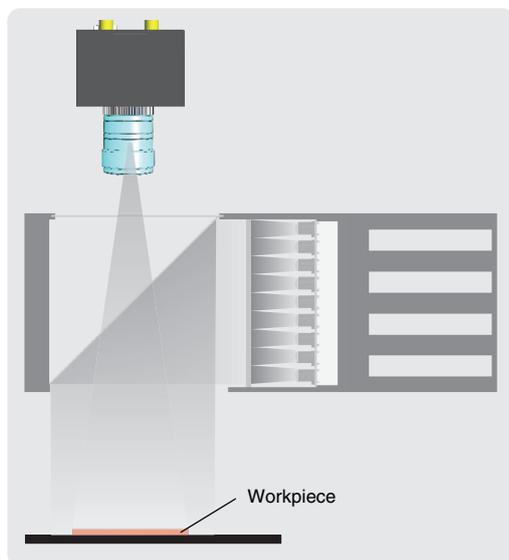

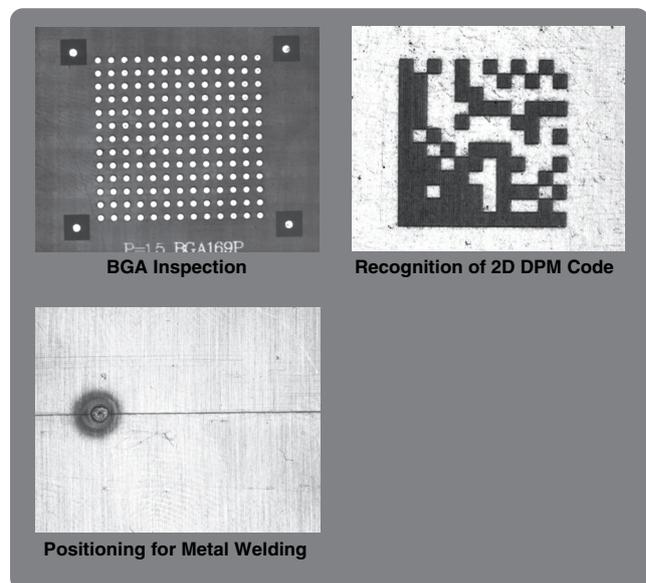

Illustration of Illumination

# Shadowless Light FLV-FS Series

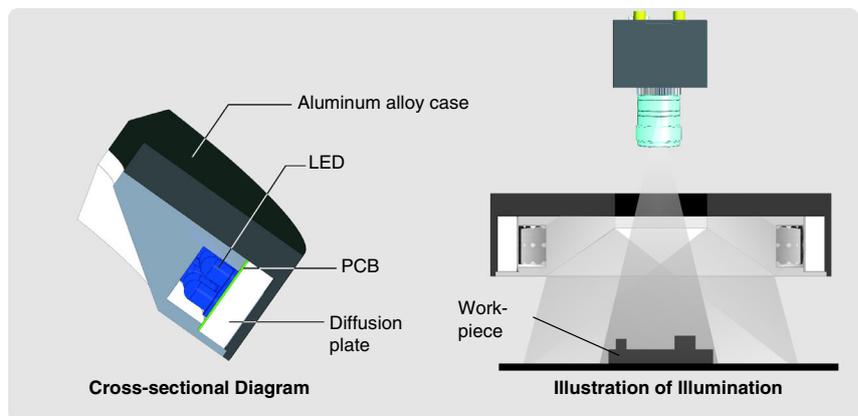

## Diffused Dome Lighting

Highly uniform illumination eliminates the influences of small surface irregularities to highlight features through changes in inclination.

## Product Features

- Uniquely designed diffusion plate achieve highly uniform illumination through reflection and diffusion.
- Eliminates the influences of small surface irregularities to highlight features through large differences in inclination.
- Saves space for small workpieces while achieving the benefits of dome lighting.

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Applications

- Edge positioning and size measurement for metal parts
- Detection of bumps in metal parts

## Ordering Information

⊙: Connectable. Light can be continuously powered. ○: Connectable. Light can be powered only while the trigger is input. X: Not connectable

\*2: If the Lighting requires more than 7.5 W of total power, an external power supply to the FLV-TCC is required.

Note: Refer to page 62 for LED safety information.

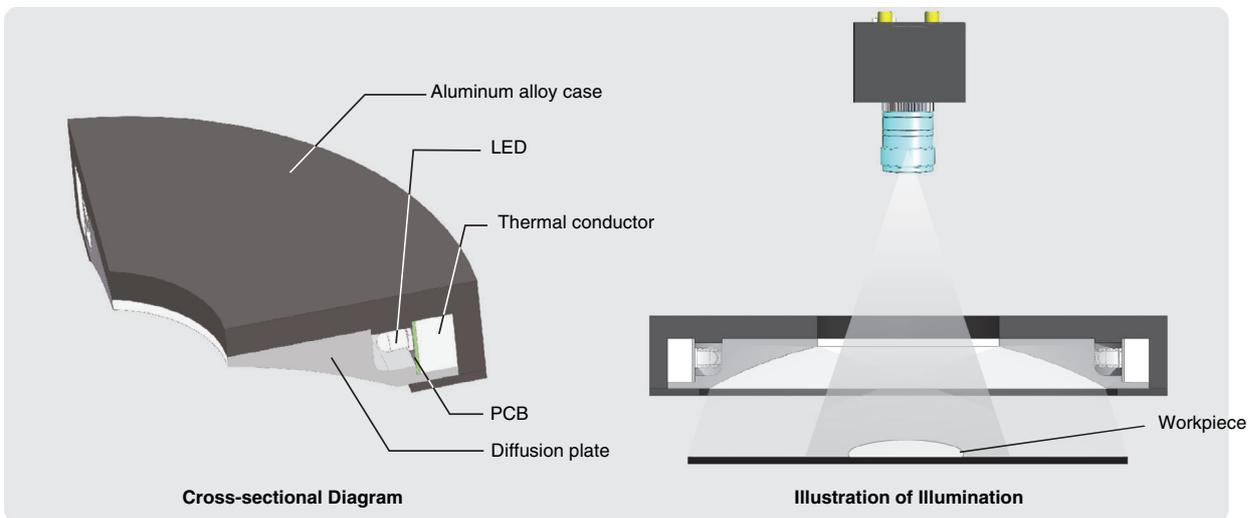

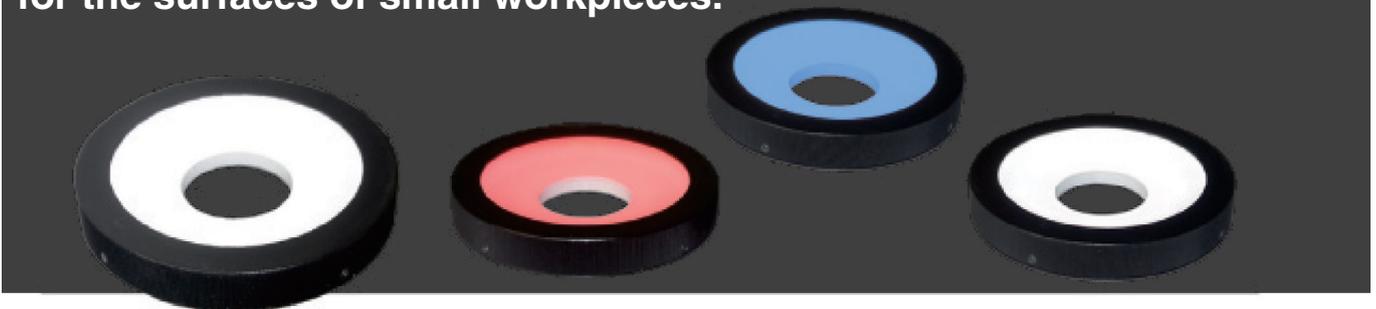

## Dimensions (Unit: mm)

# Shadowless Light FLV-FR Series

## Diffused Ring Lighting

This series effectively eliminates the influences of localized reflections for the surfaces of small workpieces.

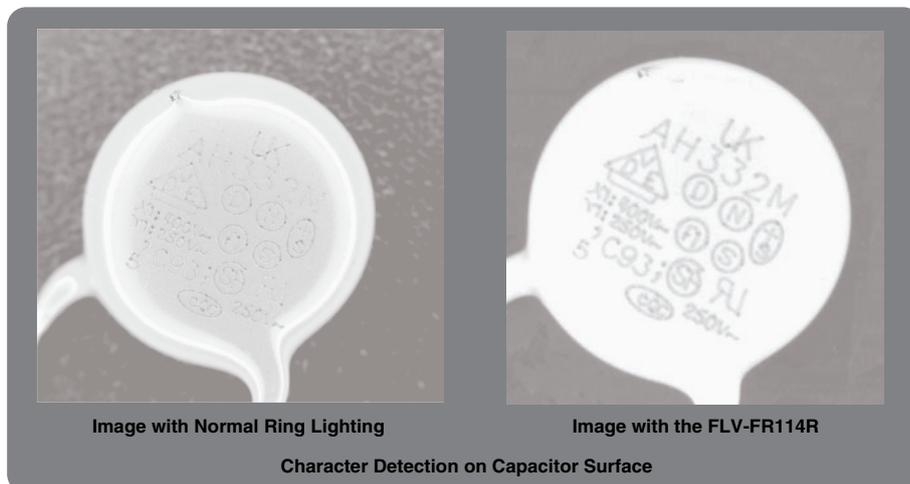

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Special diffusion plates create greater uniformity in lighting than normal ring lighting.

## Applications

- Character inspections on electronic components or formed plastic parts

## Ordering Information

Model	Light Color	Power consumption (W)	Weight (g)	Connectable Lighting Controller *1		Dimension

Note: Refer to page 62 for LED safety information.

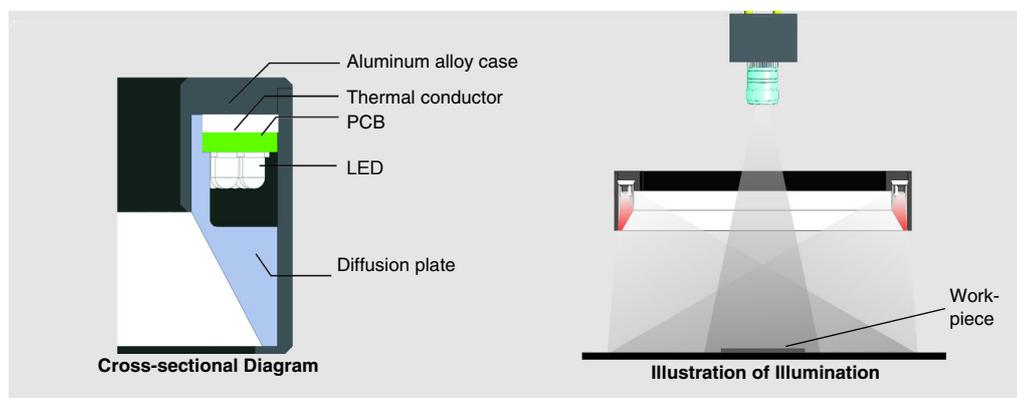

## Dimensions (Unit: mm)

# Shadowless Light FLV-FP Series

## Diffused Low-angle Lighting

This series achieves highly uniform illumination across a wide field of view. Excellent symmetry eliminates diagonal shadows.

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Shadowless Ring Lighting
- Achieve highly uniform illumination and obtain different images at different installation distances for a much wider range of application compared to normal ring lighting.

## Applications

- Detection of bumps, scratches, and other defects on surfaces
- Recognition of printed characters
- Recognition of marks
- Recognition of barcodes

## Ordering Information

## Dimensions (Unit: mm)

# Shadowless Light FLV-FQ Series

## Diffused Square Lighting

This series achieves wide highly uniform illumination across a square field of view.

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Shadowless Square Lighting
- Achieves highly uniform illumination and obtains different images at different installation distances for a much wider range of applications compared to normal ring lighting.

## Applications

- Detection of defects on workpiece surfaces
- Recognition of printed characters and bar codes

Appearance Inspections of Chip Components

## Dimensions (Unit: mm)

# Direct Back Light FLV-DB Series

## Uniform Illumination from a Flat Emitting Surface

Illumination from the back of the workpiece produces a high-contrast silhouette.

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Highly uniform backlighting with high-density LED arrays. Emphasizes the outline features of workpieces.

## Applications

- Size measurements of machine parts
- Shape detections for electronic components and ICs
- Dirt detection on films

### Dimensions (Unit: mm)

# Edge Type Light FLV-FB Series

**Ultrathin, Highly Uniform Backlights**  
Thin enough to conveniently fit into narrow spaces.

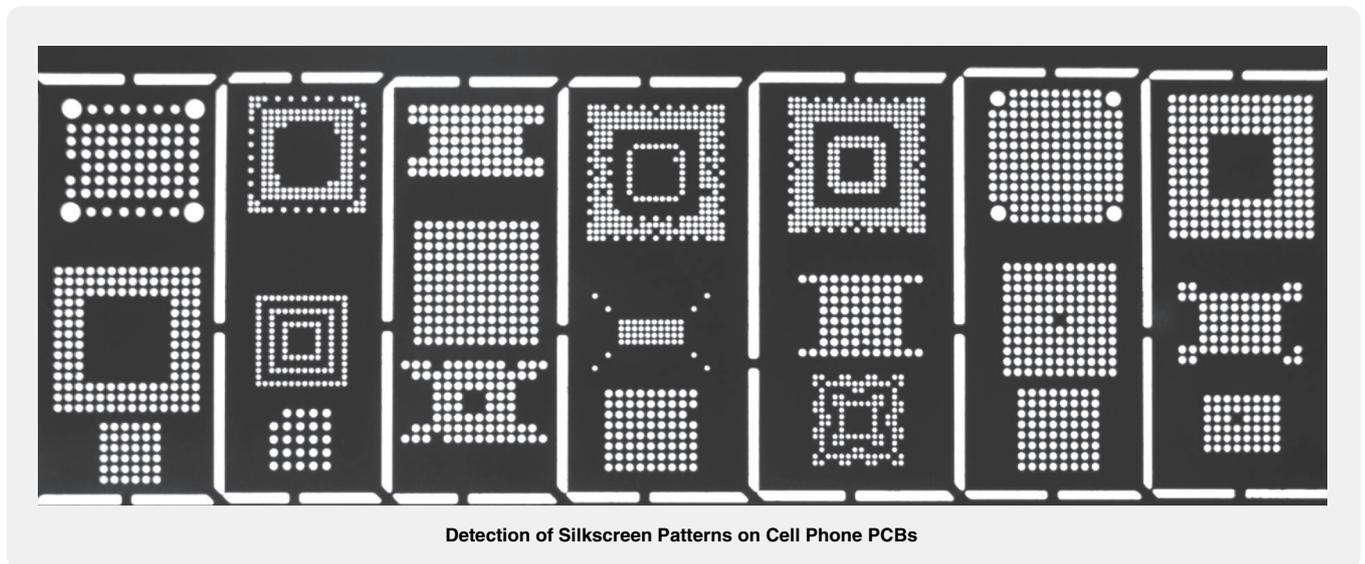

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Five size variations with emitting surfaces from 35 mm square to 164 mm square.
- As thin as 8 mm (FLV-FB7070).

## Applications

- Detection and size measurements of electronic devices
- Detection of LCD dead pixels

\*1: The table shows whether each Light can be connected to Lighting Controllers. When multiple Lights are connected to a Lighting Controller, make sure that the total power consumption of all connected Lights does not exceed the power consumption of connectable Light of each Lighting Controller.

- : Connectable. Light can be continuously powered.
- : Connectable. Light can be powered only while the trigger is input.
- X: Not connectable

\*2: If the Lighting requires more than 7.5 W of total power, an external power supply to the FLV-TCC is required.

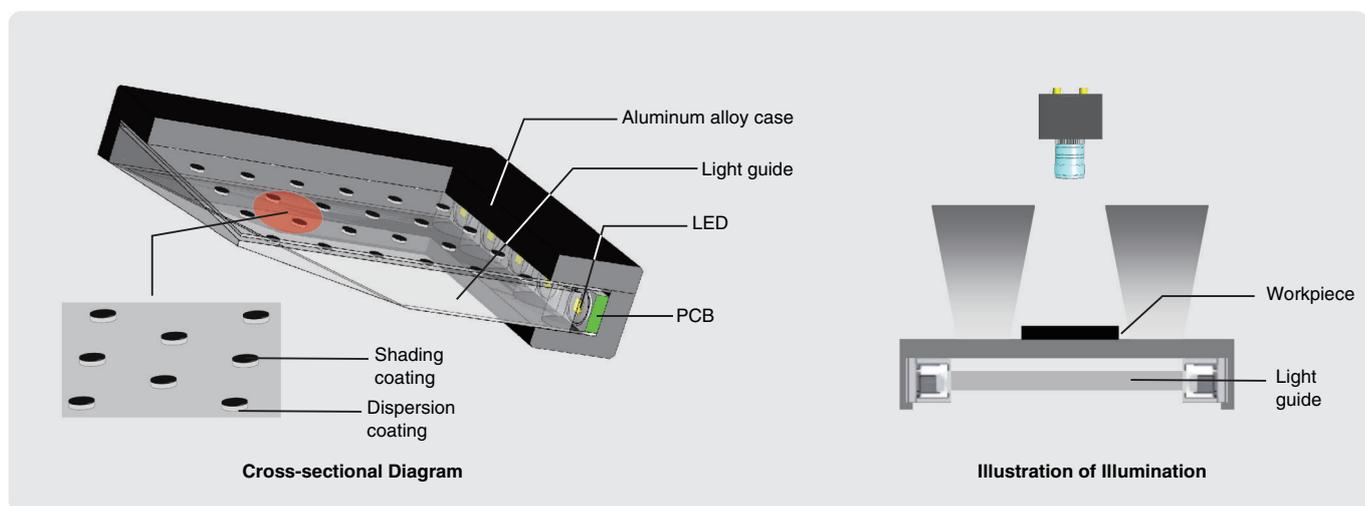

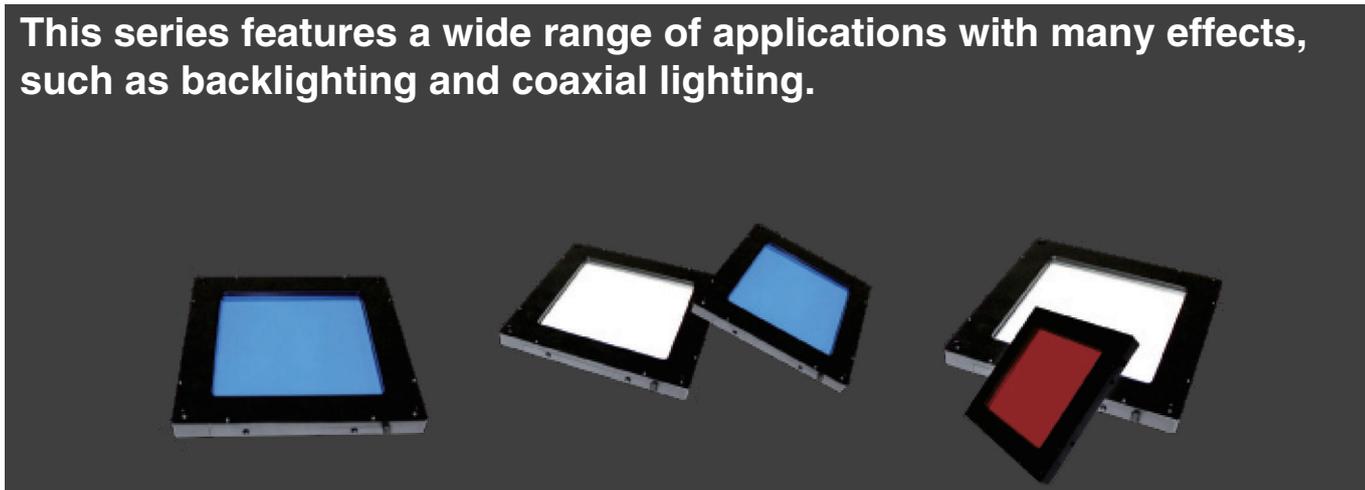

Note: Refer to page 62 for LED safety information.

### Dimensions (Unit: mm)

# Edge Type Coaxial Light FLV-FX Series

This series features a wide range of applications with many effects, such as backlighting and coaxial lighting.

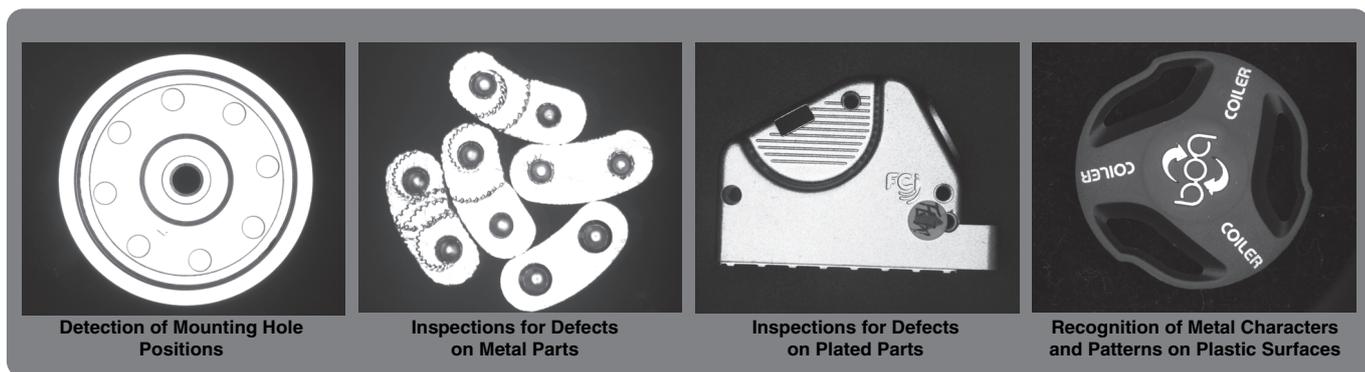

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- High uniformity with diffused illumination.
- Achieves both shadowless and coaxial illumination.
- Lightweight and compact to conveniently fit into narrow spaces.

## Applications

- Package inspections for foodstuffs, cigarettes, and household chemicals
- Appearance inspections of home appliance cases and components
- Detection, measurement, and recognition of characters and figures on highly reflective, uneven surfaces

## Dimensions (Unit: mm)

# Dome Light FLV-DD Series

## Uniform Illumination from All Directions

This series produces shadowless images of the entire workpiece.

\*: This figure is a conceptual illustration and may vary from the actual structure.

### Product Features

- Achieves uniform illumination by reflecting light from a ring-shaped light source through a highly reflective, diffusion dome.

### Applications

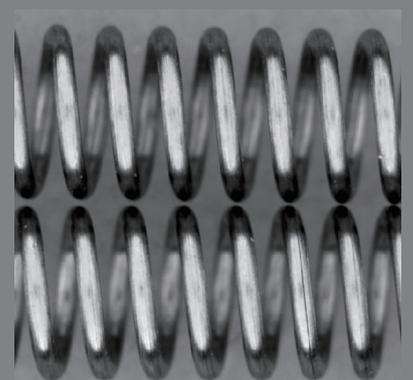

- Detection of characters and marks on curved or uneven surfaces
- Detection of highly reflective surfaces, such as metal or glass
- Shape measurements of curved or uneven workpieces

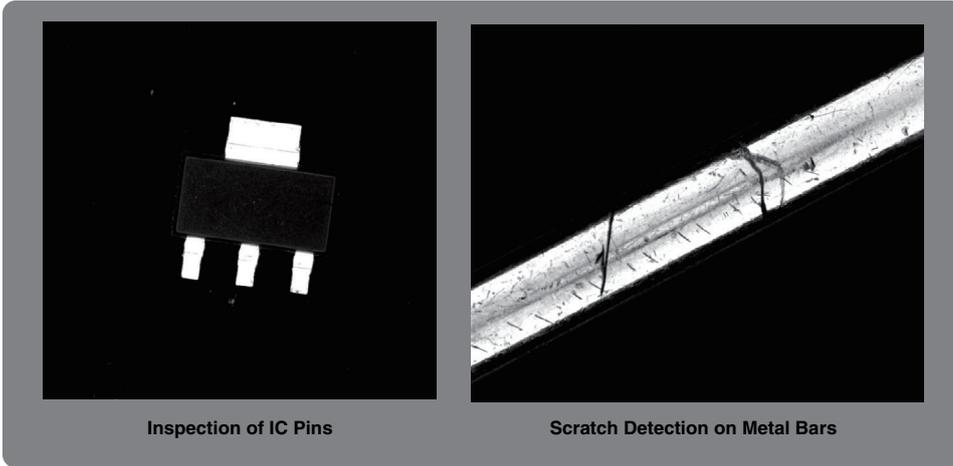

Inspection of Date Characters on Drink Cans

Detection of Characters on Cell Phones

Detection of Cracks on Spring Surfaces

### Dimensions (Unit: mm)

# High-power Spot Light FLV-EP08 Series

## High-power, Compact Spot Light Sources

\*:This figure is a conceptual illustration and may vary from the actual structure.

### Product Features

- High-power LEDs generate strong light with a compact design.
- Ideal for applications in combination with a Coaxial Lens.
- Highly efficient heat-dissipating structure ensures a long life.

### Applications

- Detection of alignment marks
- Detection of chips
- Detection of defects on workpiece surfaces

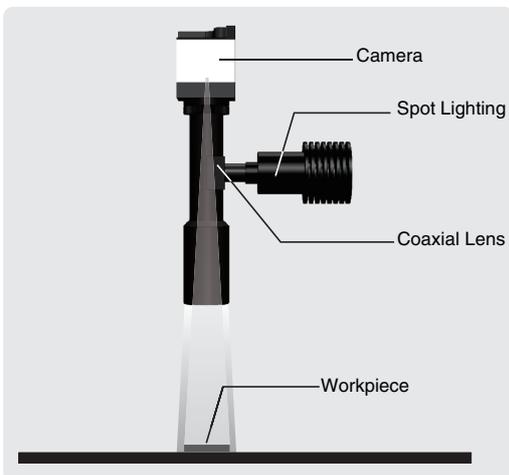

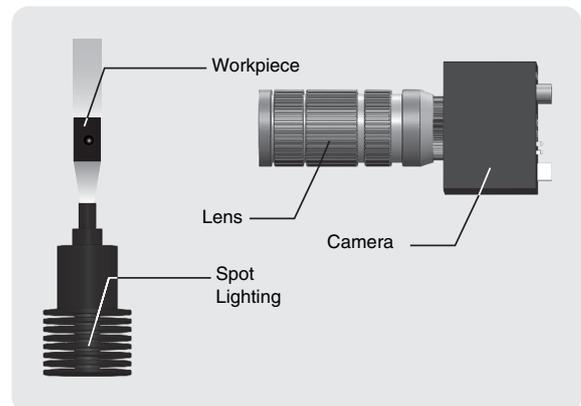

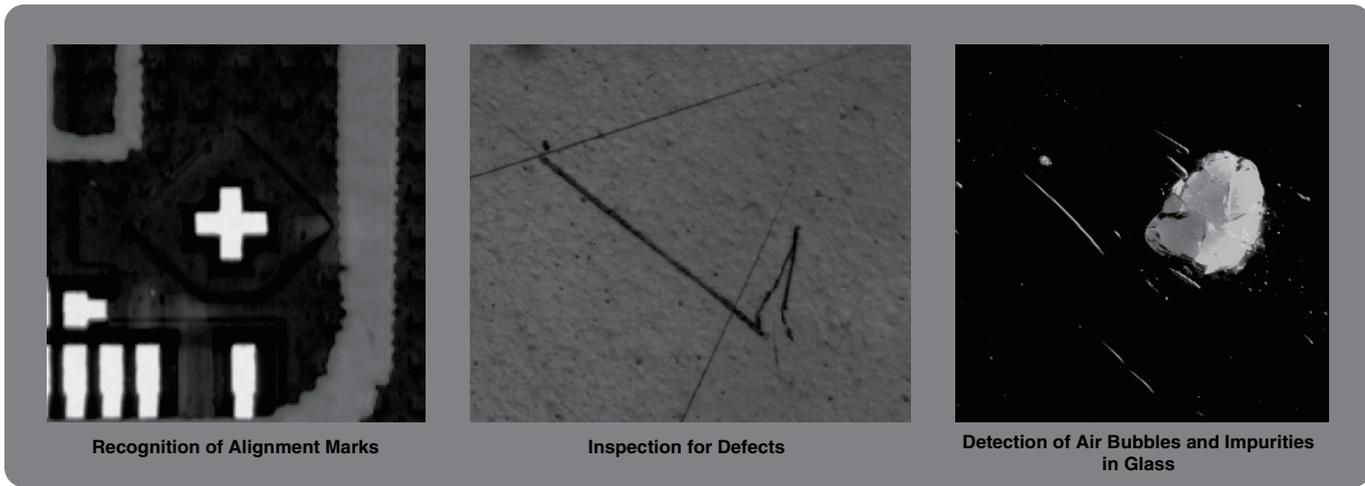

Illustration of Illumination in Combination with a Coaxial Lens

Simplified Illustration of Detection of Bubbles in Transparent Material

Recognition of Alignment Marks

Inspection for Defects

Detection of Air Bubbles and Impurities in Glass

## Dimensions (Unit: mm)

# Spot Light FLV-EP50 Series

**Long-distance Spot Lighting**  
This series achieves uniform, parallel light.

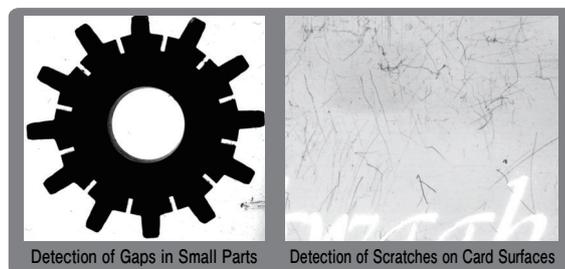

\*: This figure is a conceptual illustration and may vary from the actual structure.

## Product Features

- Superior directional characteristic, essentially parallel light, and long-distance illumination.

## Applications

- Size measurements of small workpieces
- Detection of defects on surfaces

## Camera-mount Lighting Controller for FLV Series FLV-TCC Series

### Specifications

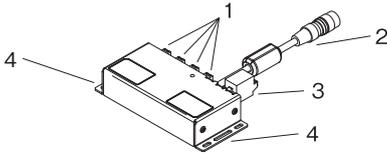

Item	Model	FLV-TCC1	FLV-TCC4
Number of connectable lightings		1	4
Applicable light		FLV series (FLV-EP series and FLV-LN series are excluded.)	
Applicable camera		FH-S series, FZ-S series	
Applicable vision system controller		FH series, FZ5 series	
Input voltage		Supplied from applicable camera (13 V) or external power supply (24 V)	
External power supply voltage *1		24 VDC±10% (including ripple)	
Current consumption		1.5 A max.	
	Recommended power supply	S8VS-06024 (manufactured by OMRON, 24 VDC, 2.5 A, 60 W)	
<b>Power for connectable lighting</b>			
<b>13 VDC supplied through camera</b>			
	Continuous lighting	7.5 W max.	4ch total 7.5 W max.
	Trigger lighting	Simultaneous lighting	4ch total 7.5 W max.
			Individual lighting
<b>24 VDC external power supply</b>			
	Continuous lighting	7.5 W max.	4ch total 7.5 W max.
	Trigger lighting	Simultaneous lighting	4ch total 15 W max. (duty: 50% max.)
			Individual lighting
Drive method		Contrast voltage method	
Lighting method		Trigger lighting, Continuous lighting	
Intensity control method		Duty light adjustment or voltage light adjustment Duty light adjustment: PWM frequency of 100 kHz, light adjustment of 255 levels Voltage light adjustment: Light adjustment of 255 levels (all are set with vision sensor controller)	
Trigger lighting		Lighting in synchronization with trigger input timing from the controller. (auto setting in accordance with shutter speed)	
	Trigger lighting delay time	T <sub>on</sub> : 30 μs max.	
	Lighting duration setting	Synchronized with the shutter speed of the camera (at trigger lighting)	
External interface		Camera connection cable (directly connected with the main unit)	
Insulation resistance		0.5 MΩ (100 VDC)	
Ambient temperature		Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)	
Ambient humidity		Operating/storage: 35% to 85% (with no condensation)	
Degree of protection		IP20 (IEC60529)	
Vibration resistance (destructive)		10 to 150 Hz, (0.7 mm double amplitude) 80 min each in X, Y, and Z directions	
Shock resistance (destructive)		150 m/s <sup>2</sup> 3 times each in 6 directions (up/down, left/right, forward/backward)	
Materials		Case: Aluminum, Cable: PVC, Camera mount plate: Aluminum	
Weight		Approx: 120 g (including the camera mount plate)	Approx: 130 g (including the camera mount plate)
Accessories		Instruction sheet, Camera mount plate, Mounting screws (M2 set screw × 4, M2 flat head screw × 4)	

\*1. When power is supplied from an external input power supply (24 V), turn ON power to the Lighting Controller at the same time as or before supplying power to the Vision System Controller.

If power is supplied to the Vision System Controller first, the Lighting Controller will not recognize the 24-V external power supply input, so Lightings which require more than 7.5 W of power will not turn ON.

# Camera-mount Lighting Controller for FLV Series FLV-TCC Series

## Part Names and Functions

No.	Name	Description
1	Lighting connecting connector	Connects to the LED lighting.
2	Camera connecting cable	Connects to the extension connector of the camera.
3	24 V external power supply input terminal block	Connect a 24-VDC power supply if the total power consumption of the Lightings exceeds 7.5 W.
4	Mounting hole for fixing screw	Holes to mount the screws to secure the Lighting Controller to a mounting plate or device.

## Mounting the Controller to the Camera

The Lighting Controller can be mounted to the Camera using the provided camera mount plate. Mounting directions are: (1) Top/Bottom mount, (2) Right side mount, (3) Left side mount.

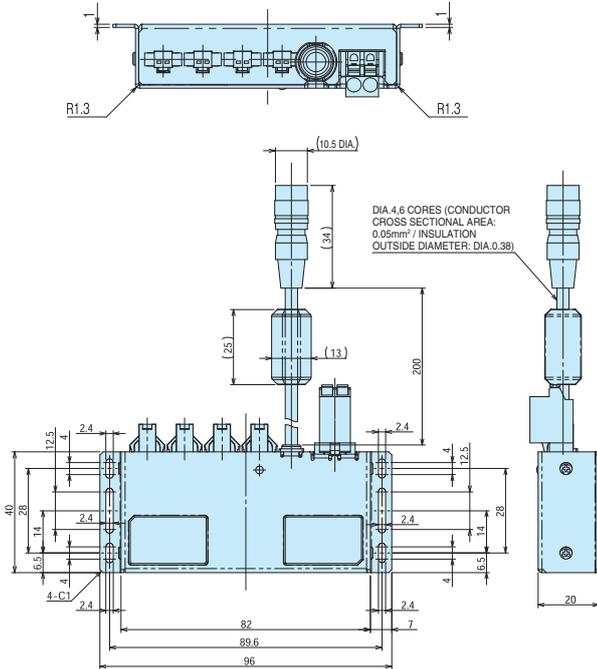

(1) Top/Bottom mount (2) Right side mount (3) Left side mount

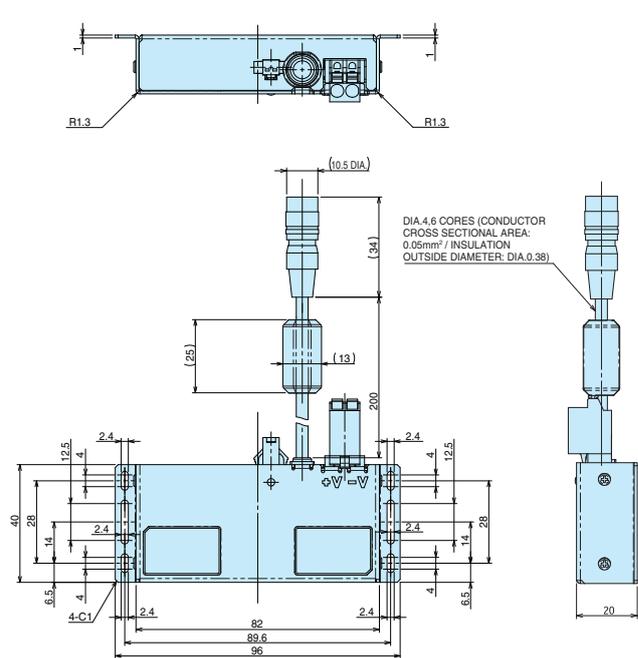

## Dimensions (Unit: mm)

### ● Lighting Controller

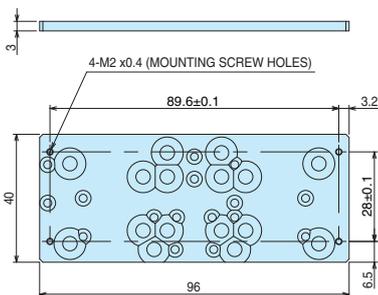

FLV-TCC4

FLV-TCC1

# Analog Lighting Controller for FLV Series FLV-ATC Series

## Stationary Lighting Controller

### Product Features

- Stationary type suitable for separate installation when no space near the Camera.
- Light emission trigger can be input directly even without Vision Sensor.

### Ordering Information

Applicable Light	Model *2	Number of Channels	Power Supply Voltage	Maximun Lighting power	Luminance Control Method
For Standard Light *1	FLV-ATC21024	2	100 to 240 VAC, 50/60 Hz	40 W max.	Analog
	FLV-ATC41024	4		3 W max.	
For Spot Light	FLV-ATC10405	1		12 W max.	
	FLV-ATC40405	4			
For Line Light	FLV-ATC26024-100V (Available soon.)	2	100 to 120 VAC, 50/60 Hz	240 W max.	
	FLV-ATC26024-200V (Available soon.)	2	200 to 240 VAC, 50/60 Hz		

\*1. Standard Light means all FLV-series Lights excluding the FLV-EP-series Spot Lights and the FLV-LN-series Line Lights.

\*2. For AC power cords: An A-type plug is standard. C-type and O-type plugs are also available. (Add "-C" or "-O" to the end of the model number.)

Plug type	A	C	O
Rated voltage	125 V	240 V	240 V
Standard	PSE	CEE	CCC

### AC Power Supply Input Cables (Excluding the FLV-ATC26024-200V)

#### ⚠ WARNING

The cable included in this package can be applied only to AC 100V commercial power in Japan. You can not use it in the country outside Japan.

Please never use it on the voltage beyond AC100V.

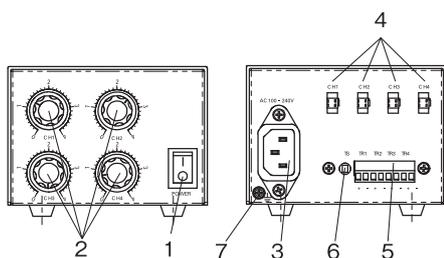

It becomes a cause of ignition, generation of heat, and failure.

Please prepare the cable appropriate to the specification of the commercial power in your country, when you use it on the voltage beyond AC 100V, for example, in the country outside Japan.

### ●Lighting Controller for Standard Light FLV-ATC21024/-ATC41024

#### Part Names and Functions

No.	Name	Description
1	Main power supply	Starts up the Controller when it is turned ON.
2	Lighting adjustment volume	Rotating the volume clockwise increases the emission intensity or counterclockwise decreases it.
3	AC power supply input connector	A terminal to supply AC power. Connect the provided AC input cable.
4	Lighting connector	Connects an LED lights.
5	Trigger input terminal block	A terminal block for lighting illumination trigger input from outside to each lighting.
6	Lighting mode switching button	Lighting mode switch button is ON (The button is pushed.): Short-circuiting (+) and (-) of TR1 to TR4 respectively makes the trigger input status ON, turning the light ON. Releasing (+) and (-) makes the status OFF, turning the light OFF.  Lighting mode switch button is OFF (The button is not pushed.): Short-circuit (+) and (-) of TR1 to TR4 respectively makes the trigger input status OFF, turning the light OFF. Releasing (+) and (-) makes the status ON, turning the light ON.
7	Frame ground terminal	A terminal for frame ground. Connect the ground line.

Current consumption		1 A max.	
Electricity of connectable lighting		2ch total 40 W max. 30 W max. for 1ch	4ch total 40 W max. 30 W max. for 1ch
Drive method		Constant voltage method	
Lighting method		Trigger lighting, Continuous lighting	
Intensity control method		Voltage light adjustment: 14.0 to 24.0 V	
Trigger lighting		Lighting in synchronization with input from the trigger input terminal	
Trigger lighting delay time		T_on: 100 μs max.	
External interface		Trigger input terminal block	
Dielectric strength		1500 VAC	50/60 Hz 1 min
Insulation resistance		20 MΩ (500 VDC)	
Ambient temperature		Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)	
Ambient humidity		Operating/storage: 35% to 85% (with no condensation)	
Degree of protection		IP20 (IEC60529)	
Vibration resistance (destructive)		10 to 150 Hz, (0.2 mm double amplitude) 80 min each in X, Y, and Z directions	
Shock resistance (destructive)		150 m/s <sup>2</sup> 3 times each in 6 directions (up/down, left/right, forward/backward)	
Materials		Case: Aluminum	
Weight		Approx. 800 g	
Accessories		Instruction sheet, AC input cable *1	

\*1: The suffixed symbol of the model name means the plug type of the accessory cable. A model name with no suffix means type A.

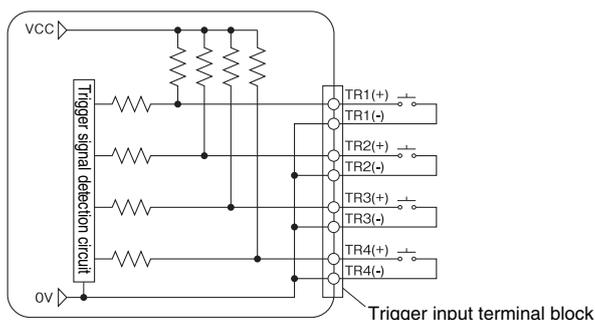

\*2: This product is the exclusive use for apparatus inclusion in the industrial machine field.

This product cannot be used for the connection to electric power equipment, such as a common residence, store, and small establishment, because of nonconformity with to Electrical Appliance and Material Safety Law (PSE).

## Connecting to External Trigger Input Terminal Block

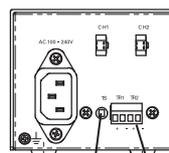

- Connection of this terminal block is not required if lighting illumination trigger input from outside is not used.

### <Connection of trigger input terminal block>

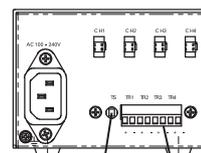

\* Current flowing through the short circuit is less than 2 mA.

#### ● FLV-ATC21024-□

Lighting mode switch button  
Trigger input terminal block CH1 to CH2

#### ● FLV-ATC41024-□

Lighting mode switch button  
Trigger input terminal block CH1 to CH4

Lighting mode switch button is ON (The button is pushed.)

Short-circuiting (+) and (-) of TR1 to TR4 respectively makes the trigger input status ON, turning the light ON.  
Releasing (+) and (-) makes the status OFF, turning the light OFF.

Lighting mode switch button is OFF (The button is not pushed.)

Short-circuit (+) and (-) of TR1 to TR4 respectively makes the trigger input status OFF, turning the light OFF.  
Releasing (+) and (-) makes the status ON, turning the light ON.

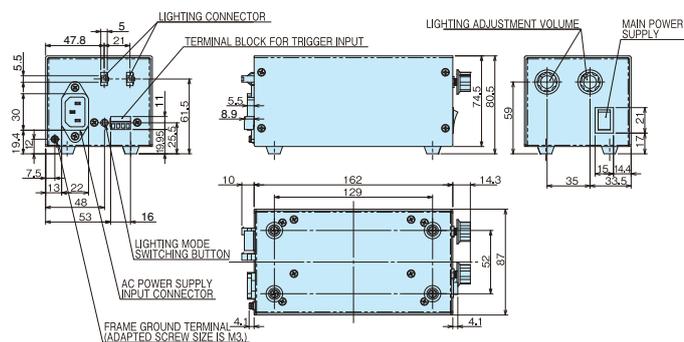

### [Important]

- Make sure that excessive force is not imposed on the wire and terminal block.
- Do not install the product in which loads are constantly applied to the terminal block such as the wire being under tension.
- When wiring the terminal block, use an applicable cable (AWG 14 to 24, tip processing length: 7 mm).

Accessories		Instruction sheet, AC input cable *1	

\*1: The suffixed symbol of the model name means the plug type of the accessory cable. A model name with no suffix means type A.

\*2: This product is the exclusive use for apparatus inclusion in the industrial machine field.

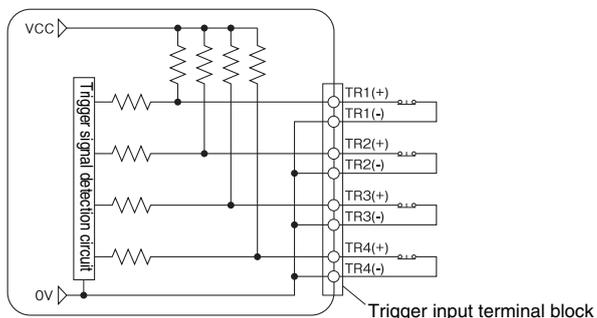

This product cannot be used for the connection to electric power equipment, such as a common residence, store, and small establishment, because of nonconformity with to Electrical Appliance and Material Safety Law (PSE).

## Connecting to External Trigger Input Terminal Block

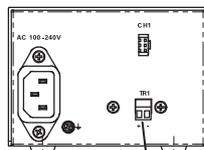

- Connection of this terminal block is not required if lighting illumination trigger input from outside is not used.

### <Connection of trigger input terminal block>

\* Current flowing through the short circuit is less than 2 mA.

### ●FLV-ATC26024-□

Trigger input terminal block CH1 to CH2

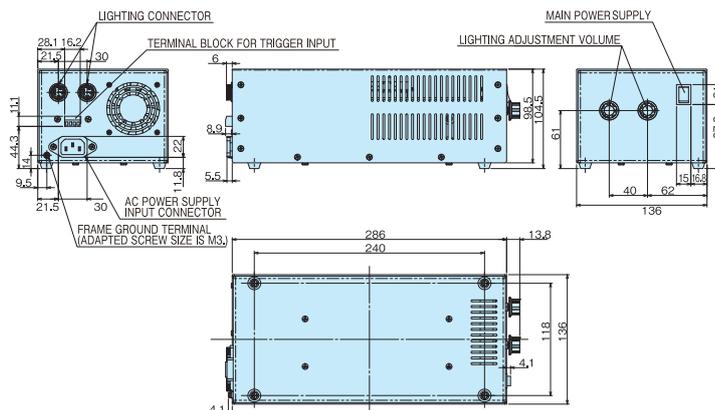

Short-circuiting (+) and (-) of TR1 to TR2 respectively makes the trigger input status OFF, turning the light OFF.  
Releasing (+) and (-) makes the status ON, turning the light ON.

### [Important]

- Make sure that excessive force is not imposed on the wire and terminal block.
- Do not install the product in which loads are constantly applied to the terminal block such as the wire being under tension.
- When wiring the terminal block, use an applicable cable (AWG 14 to 24, tip processing length: 7 mm).

## Dimensions (Unit: mm)

# Direct Ring Light FL-DR Series

Clear Images with Industry's Best Level\* of Brightness and Illumination over a Wide Field of View

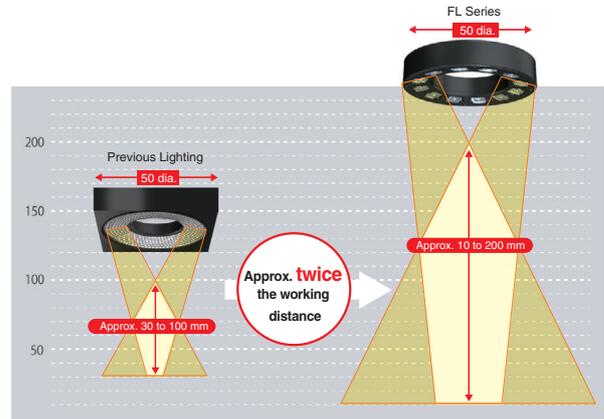

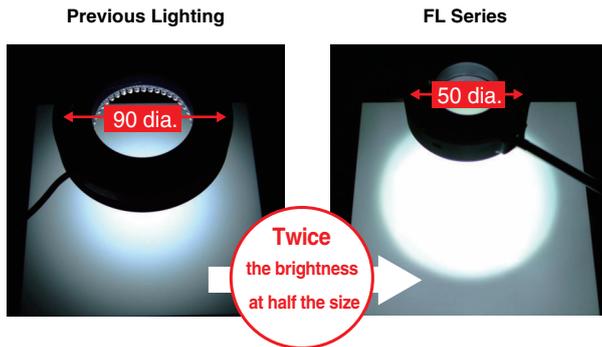

\*: Based on OMRON testing in November 2010.

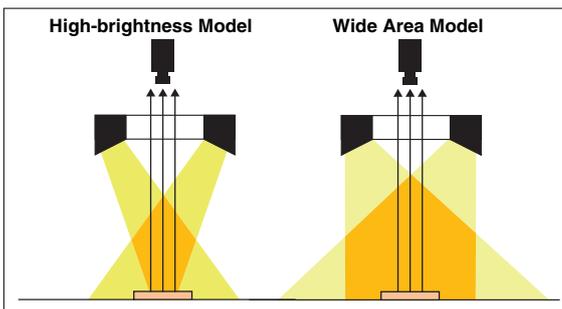

Light  
FL Series  
High-brightness Models

## Product Features

- High brightness in a small package.
- Wide range of working distance.

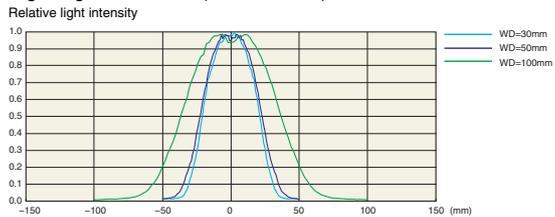

## Illumination Structure

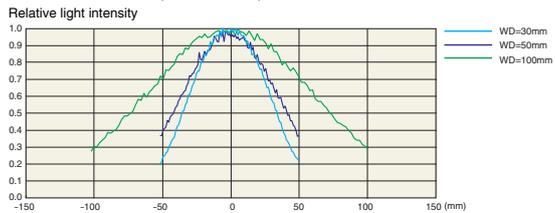

## Lighting Intensity Distribution Characteristics

High-brightness Model (FL-DR50W-H)

Wide Area Model (FL-DR50W)

## Applications

Previous Lighting

Faster lines make it necessary to increase shutter speeds, but then the clarity of workpiece images decreases.

FL-series

More than sufficient brightness is provided for high-speed lines.

Previous Lighting

It was necessary to create different inspection standards for each section.

FL-series

With uniform lighting from corner to corner, it is possible to inspect.

FL Series  
High-brightness Models

# FL-BR Series

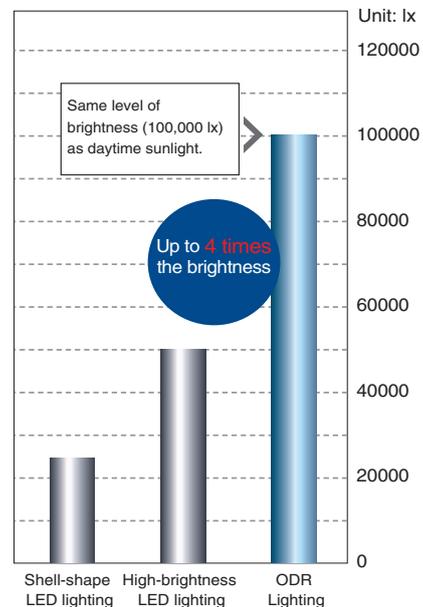

The highest level\* of brightness in the industry.  
This series is structured for adaptable wiring and mounting.

\* Based on OMRON testing in November 2010.

## Product Features

- High-brightness ODR lighting beyond the limitations of LEDs.
- Stable inspection even for high-speed applications.
- Bright even through a polarizing filter.
- Easy wiring, mounting, and adjustment.

## Wiring

The cable can extend from either direction, allowing for horizontal or vertical wiring layouts on the mounting surface.

## Mounting and Adjustment

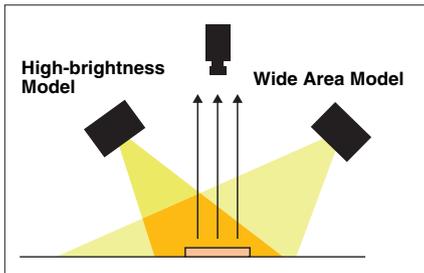

The light is structured for mounting with nuts to an arm on the back or side surfaces. Minute changes in the position can be achieved by sliding the light.

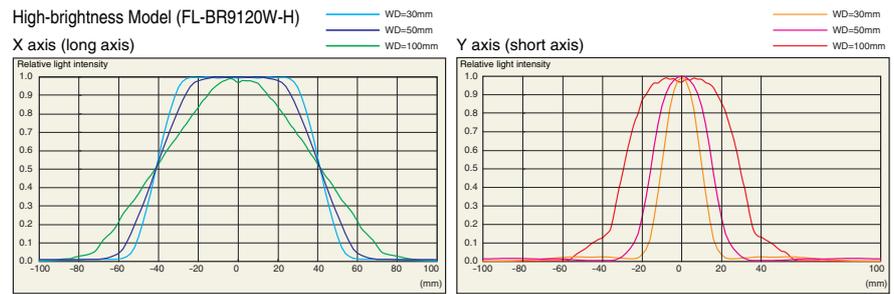

Specialized mounting brackets enable mounting at a flexible angle.

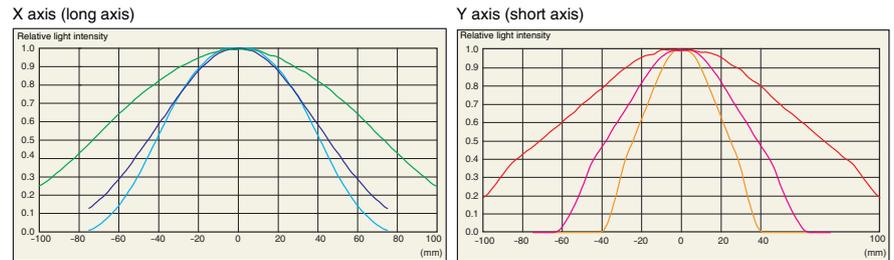

## Illumination Structure

## Lighting Intensity Distribution Characteristics

Wide Area Model (FL-BR9120W)

## Applications

Standard Lighting

It is difficult to read characters with low contrast.

FL Series

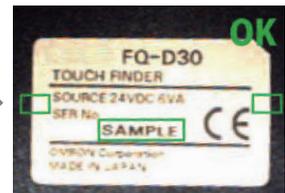

Sharp images are created of both two-dimensional codes and characters.

Standard Lighting

Inspection is not possible because of workpiece blurring or a lack of brightness.

FL Series

Complete extraction of edges and characters.

Light High-brightness Models FL Series

# Digital Lighting Controller for FL-series

## FL-STC Series

Small body is combined with the long cable at 25 m. Install in essentially any location.

Two-channel models

One-channel models

Light High-brightness Models FL Series

## Product Features

### ● Easy Control and Adjustment of the Lighting

With a compact design small enough to fit in the palm of your hand, the Controller can be built into the control panel or in the gap between production lines.

By using the longest lighting cable in the industry (25 m), the Controller can be installed along with the image processing monitor in a variety of locations. It is possible to adjust the lighting while looking at the screen.

#### Connect to a Remote Control Panel

#### Mount to a DIN Rail underneath the Line or in the Gap between Tables

### Lighting Control without Programming

This enables light emission synchronized with the camera using essentially any trigger, such as a photoelectric sensor. The Controller can be connected to an image processing device to control lighting without any programming on a PLC.

#### [ Control Output ]

- PNP/NPN models
- Power source: 24 V

#### [ Lighting Emission Controls ]

- Lighting triggers can be used individually for each channel.
- Lighting delay and lighting time can be controlled.

### Intuitive Digital Light Controls

Digital adjustment of light emission makes it easy to reproduce the lighting environment after line switchovers.

The quantity of light is displayed digitally in 400 levels. Adjust the light in fine detail.

▲ Increases brightness

▼ Decreases brightness

Type	Model	I/O specification	Input voltage
One-channel models	FL-STC10	NPN	24 VDC
	FL-STC15	PNP	
Two-channel models	FL-STC20	NPN	
	FL-STC25	PNP	

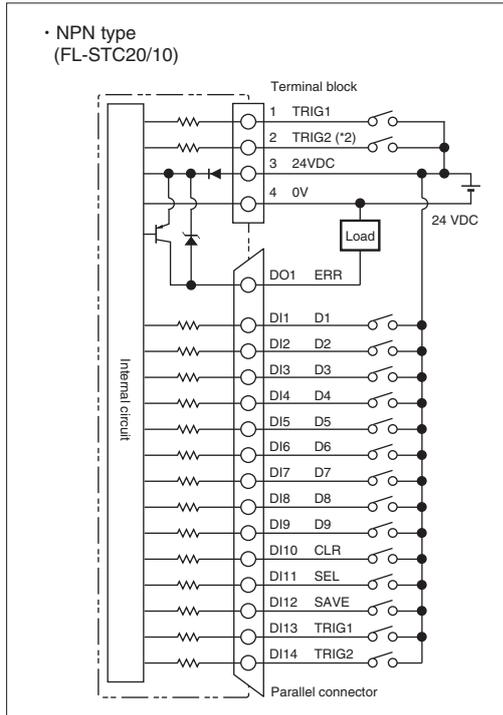

## Specifications

Product type		One-channel models	Two-channel models		
I/O type		NPN	PNP	NPN	PNP
Model		FL-STC10	FL-STC15	FL-STC20	FL-STC25
Power supply voltage		24 VDC±10% (including ripple)			
Power consumption		36 W, 1.5 A max. (including the lighting section)		72 W, 3 A max. (including the lighting section)	
Number of output channels		1		2	
Applicable light		FL-□ Series			
Luminance control method	CONTINUOUS mode	While the Strobe Controller power source is ON, light is continuously emitted. PWM frequency: 100 kHz, Light adjustment: 400 levels			
	EXTERNAL TRIGGER mode	Lighting in synchronization with an external trigger input. Lighting duration: Continuous while the trigger is input, or 0.1 to 99.9 ms (set in 0.1-ms increments) PWM frequency: 100 kHz, Light adjustment: 400 levels			
	STOROBE mode	Lighting in synchronization with the external trigger input, but twice brighter than EXTERNAL TRIGGER mode. Lighting pulse width: 0.01 to 5 ms (light adjustment: 500 levels equivalent)			
Luminance adjustment	Key	Luminance control method and adjustment value: Slide switch and cross key setting			
	I/O	Luminance adjustment value: 9-bit binary input control			
External interface		Parallel I/O connector (D-sub 15-pin), Terminal block (external trigger input with 2 terminals, power source voltage input with 2 terminals)			
Ambient temperature		Operating: 0 to 40°C, Storage: -15 to 60°C (with no icing or condensation)			
Ambient humidity		Operating/storage: 35% to 85% (with no condensation)			
Vibration resistance		10 to 150 Hz (0.7 mm double amplitude), 80 min each in X, Y, and Z directions			
Shock resistance		150 m/s <sup>2</sup> 3 times each in 6 direction (up/down, left/right, forward/backward)			
Materials		Case: PC			
Degree of protection		IEC60529 IP20			
Weight		Approx. 100 g			
Accessories		Instruction sheet, Terminal block connector

# Camera-mount Lighting Controller for FL Series

## FL-TCC Series

### Camera-mount Compact Lighting Controller Which Requires No Power Supply Nor Lighting Control

### Product Features

- No separate power supply is required because the power is supplied from the Camera.
- Light is emitted when a trigger signal is received from the Camera.
- Simple connection between the Camera and the Lighting with a single cable

### Ordering Information

Item	Model	Weight
Lighting Controller	<b>FL-TCC1</b>	Approx. 110 g
Camera Mounting Spacer	<b>FL-TCC1-XSP</b>	Approx. 10 g
Camera Mounting Attachment	<b>FL-TCC1-XAT</b>	Approx. 20 g

### Specifications

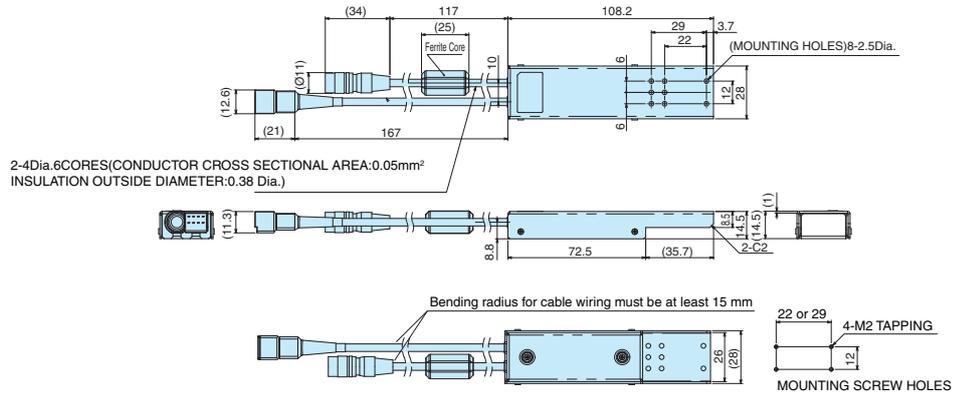

#### ●Lighting Controller

Product type		Lighting Controller
Model		FL-TCC1
Input voltage		Supplied from applicable camera.
Applicable camera		FH-S/SC/S02/SC02/S04/SC04, FZ-S/SC/S2M/SC2M/S5M2/SC5M2/SH/SHC/SF/SFC/SP/SPC, FQ-MS series and others.
Applicable controller		FH series, FZ5 series, FZ4 series and others.
Power consumption		10 W, 0.9 A max. (including the lighting section)
Number of output channels		1
Applicable lighting		FL-□ series
Luminance control method	Functions	PWM frequency: 100 kHz, Light adjustment: 255 levels (set with the Controller)
	Trigger lighting	Lighting ON synchronized with trigger input timing from the Controller. (Auto setting in accordance with the shutter speed.)
	Trigger lighting delay time	Ton: 30 μs max. (Trigger ready μs) Toff: 10 μs max.
External interface		Dedicated communication connector
Ambient temperature		Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)
Ambient humidity		Operating/storage: 35% to 85% (with no condensation)
Vibration resistance		10 to 55 Hz, (0.7 mm double amplitude) 80 min each in X, Y, and Z directions
Shock resistance		150 m/s <sup>2</sup> 3 times each in 6 directions (up/down, left/right, forward/backward)
Materials		Case: SECC, Cable: PVC
Degree of protection		IP20 (IEC60529)
Weight		Approx. 110 g
Accessories		Instruction sheet, Insulation sheet, Mounting screw (M2 × 6 mm) × 4

\* 3Z4S-LE SV-7525H with focal length of 75 mm and 3Z4S-LE SV-10028H with focal length of 100 mm are also available.

## Dimensions (Unit: mm)

# VS-MC Series

- Lineup of 7 models with focal lengths ranging from 15 to 75 mm.
- A lock ring locks the surface to increase resistance to vibration in comparison to a point lock with a lock screw. This enables application in environments where the lens is moved or where the affects of ambient vibration are large.
- Install in narrow space without a lock screw.

\*1: Calculated using a permissible circle of confusion diameter of 0.04 mm.

## Dimensions (Unit: mm)

# Lenses for FZ-series small cameras

## FZ-LES Series

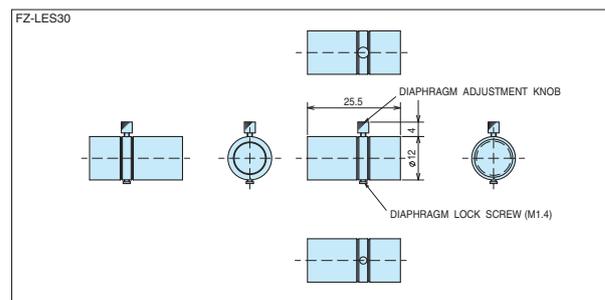

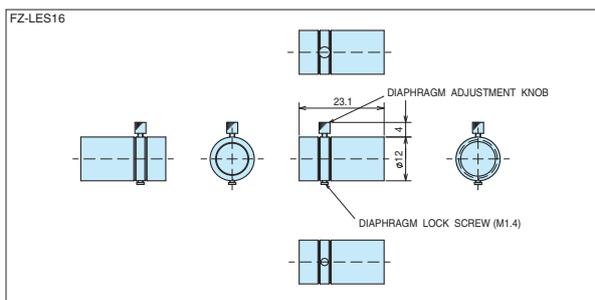

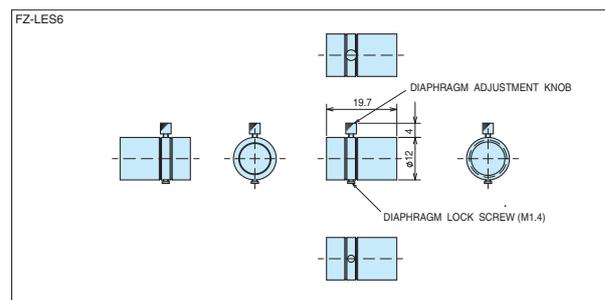

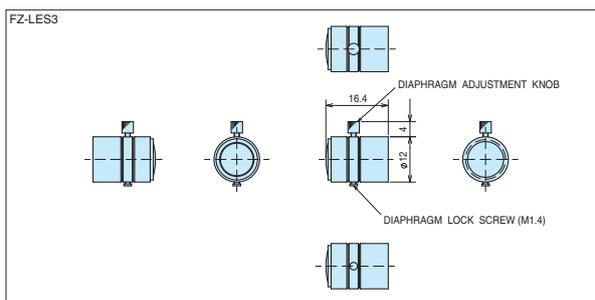

- Product lineup includes two types of small camera lenses, a pen type with a 12-mm diameter and a flat type with a 17-mm thickness.

### Ordering Information

Recommended cameras	Model	Focal length (mm)	Focus (F No.)
FZ-SF□ FZ-SP□	FZ-LES3	3	F2.0
	FZ-LES6	6	F2.0
	FZ-LES16	16	F3.4
	FZ-LES30	30	F3.4

### Dimensions (Unit: mm)

### Extension Tubes for Small Digital CCD Cameras

Model	Contents
FZ-LESR	Set of 3 tubes (15 mm, 10 mm, 5 mm) Maximum outer diameter: 12 mm dia.

# Non-telecentric Macro Lens VS-MC Series

- Lineup of 4 models with magnifications ranging from 0.1 to 1.0 and WD ranging from 82.4 to 325.5 mm.
- 16-mm-dia. simple mechanism with high resistance to vibration.

# Terms and Conditions Agreement

## Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

## Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

## Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

## Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

## Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

## Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

## Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
