Transition to Made-to-order Production for General-purpose AC Servo MR-C Series

Thank you for your continued patronage of the Mitsubishi general-purpose AC servo and FA products. The MR-C series has been manufactured based on market requirements for 13 years since its release. However, we have difficulty to maintain the production system since some parts of the MR-C series are obsolete. Therefore, the MR-C series will be only available as a made-to-order product. We ask for your understanding in this matter.

1. Target Models

Servo amplifier

MR-C-10A, MR-C-20A, MR-C-40A, MR-C-10A1, MR-C-20A1

Servo motor

HC-PQ033(B), HC-PQ053(B)(G1/G2), HC-PQ13(B)(G1/G2), HC-PQ23(B)(G1/G2),
HC-PQ43(B)(G1/G2)
HC-KQ053(B), HC-KQ13(B), HC-KQ23(B), HC-KQ43(B)

2. Schedule

Transition to made-to-order production: April 2011

The products can be delivered in eight to ten weeks after receipt of order.

3. Others

The MR-JN series is available as an alternative to the MR-C series. Please consider replacing the MR-C series with the MR-JN series.

Item	Target model	Alternative model	Remarks
Servo amplifier	MR-C: 100 to 400W (200VAC input) 100 to 200W (100VAC input)	MR-JN: 100 to 400W (200VAC input) 100 to 200W (100VAC input)	With mounting compatibility
Servo motor	HC-PQ: 30 to 400W HC-KQ: 50 to 400W	HF-KN: 50 to 400W HF-KP: 50 to 400W (Note)	With mounting compatibility

Note. The HF-KP has a reduction gear.

Precautions for Replacing MR-C Series with Alternative MR-JN Series

1. Overview

The functions and the performance of the MR-JN series has greatly improved compared to the MR-C series, and the both series have mounting compatibility.

2. Alternative Models

The following tables show the standard replacement examples when the servo amplifier and the servo motor are replaced in sets.

<Servo amplifier>

Type	Target model	Alternative model	Mounting compatibility	Precautions
Single-phase 200V general-purpose interface (International standards compliance (Note))	MR-C-10A (MR-C-10A-UE)	MR-JN-10A	<input type="radio"/>	For differences in the detailed specifications and in the functions, refer to Chapter 3.
	MR-C-20A (MR-C-20A-UE)	MR-JN-20A		
	MR-C-40A (MR-C-40A-UE)	MR-JN-40A		
Single-phase 100V general-purpose interface (International standards compliance (Note))	MR-C-10A1 (MR-C-10A1-UE)	MR-JN-10A1	<input type="radio"/>	The encoder and the power supply connector must be changed.
	MR-C-20A1 (MR-C-20A1-UE)	MR-JN-20A1		

Note. The MR-JN series complies with the international standards as standard.

3. Comparisons on Outline Dimensions and Installation Dimensions

<Servo amplifier>

Since the MR-JN series has smaller dimensions compared to the MR-C series, the both series have mounting compatibility.

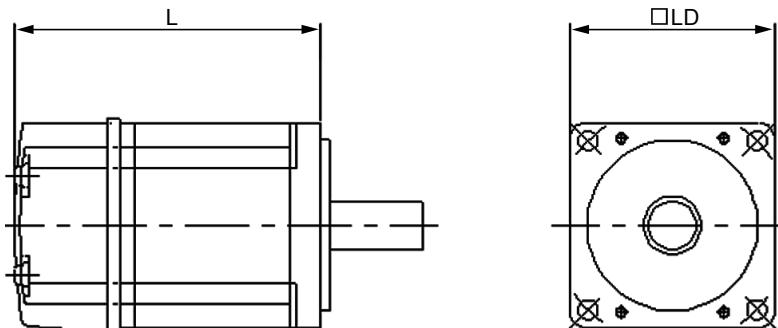

Comparison of outline dimensions (with the same rated output capacity)

[Unit: mm]

Model		Height in common	Width		Depth	
MR-C series	MR-JN series		MR-C	MR-JN	MR-C	MR-JN
MR-C-10(A/A1)(-UE)	MR-JN-10(A/A1)	130	40		100	135 (Note)
MR-C-20(A/A1)(-UE)	MR-JN-20(A/A1)		60	50	104	
MR-C-40A(-UE)	MR-JN-40A					

Note. The depth of the MR-JN series is larger than that of the MR-C series.
