

KGNW Series Control Stations

IP40 Enclosed Steel Control Stations Mounting of ø22 mm Switches and Pilot Lights with Space-Saving Design

The KGNW control stations are designed for mounting IDEC ø22 mm (7/8 inch) switches and pilot lights.

- Various standard control stations are available from one to four holes with most widely used combinations of switches and pilot lights (contact configurations, voltage, button colors, and nameplates).
- Enclosures only are also available, in which specifically selected TW series can be mounted as required.

Ideal for small control stations

Instructions

Precautions for Opening the Knockout Hole

- The metal piece for the inner hole of ø22 or ø16 mm knockout has two linked parts to the outer hole. When breaking the knockout to make an inner hole, strike the inner metal piece at the cut parts (the hatched parts shown as point A at right) using a screwdriver tip or similar tool.
- When opening a larger hole of ø27 or ø20 mm, first make a smaller hole as described above. Then break the knockout for the larger hole using pliers.
