Centralized data management through a LAN network.

Easy network connection through Ethernet. Centralized management of measured data is possible immediately after installation, achieving low-cost operation. Also, data can be logged automatically at all times, reducing man-hours for measurement and labor costs. Easy-to-use GUI allows you to visualize the entire clean environment.

ZN-THX21-S

Precision measurement of temperature and humidity around production lines and equipment.

Thermo-Humidity Station

ZN-THX21-SA (Station)
ZN-THS11-S (Sensor head: 1.5 m type)

| -25 to 60°C (Accuracy: ±0.3°C) | 0% to 99% (Accuracy: ±2.5%) |

∗ At 25°C, 10% to 85%

ZN-THS17-S (Sensor head: Anchored type)

| 0 to 60°C (Accuracy: ±0.3°C) | 20% to 85% (Accuracy: ±2.5%) |

Unparalleled measurement accuracy

Precision measurement ensures a temperature resolution of 0.1°C and humidity accuracy of plus/minus 2.5%. This enables more precise control of temperature and humidity, which contributes to improvement in product quality.

Temperature measurement accuracy
±0.3°C
(at 25°C)

Humidity measurement accuracy
±2.5%
(at 25°C, 10% to 85%)

Temperature resolution
0.1°C
Built-in hybrid logging engine

Data can be logged to the unit (SD Card) while communicating with PC (or PLC) via LAN. Even in the event of network error, the unit will continue to record data. Production technology divisions can centrally control management via network while manufacturing floors can localize control using SD cards.

SD Card slot

Alarm output for immediate response when trouble occurs

The station has an alarm output. Unusual temperature and humidity are made visible, enabling you to make a quick response and to make it easy to systemize manufacturing lines.

Thermo-humidity Error Alert!

Indicator light

Setting example:
When temperature exceeds threshold value, the indicator light turns on
Temperature and humidity are essential data for quality control on the manufacturing floor.
Constantly visualize the changes in temperature and humidity at multiple points.

Big and legible!
Large and easily viewable LCD display with two rows and five characters in each row.

Start recording with a single push of a button.

Sensor head slot

DC cable/ AC adaptor terminal

LAN port

SD Card slot

Alarm output terminal

Easy to hang on wall as well
On the reverse side, there are two types of holes; for wall-hanging and for fixing. Magnets are also available (sold separately).

Thermo-Humidity Station is used at the following places...

Heat emission control in various types of processing equipment

Precision measurement contributes to control severe temperature and humidity in the processing equipment.

Temperature and humidity control in data centers

The Station contributes to heat emission control of various types of servers in data centers.

With back-up using commercially available AAA batteries, operation continues even during sudden power outage

With built-in battery backup, LAN communication and logging operation won't stop even in the event of power outage or sudden disconnection.

∗ In network mode, operation continues for approximately two hours on batteries alone. However, battery life will vary depending on the measurement environment, battery type, or battery performance.

Manganese batteries cannot be used.

Bundled with simple, user-friendly PC software

Simple, user-friendly PC software* is available as a standard feature (Station Utility: Setup tool, logging tool, and SD Viewer ES).
Unit setup and data logging are possible via LAN network.
Also, logged data can easily be displayed in the waveform graph.

* Download the PC Software Station Utility from the following OMRON website (http://www.fa.omron.co.jp/station-u-e) .
Setup	Logging	Data display
Batch setup of multiple units	Automatic file output at regular intervals	Intermittent data files can be integrated to display in the waveform graph.
To view waveform graphs in real time, and display measured values on a floor plan of the site, it is necessary to install Wave Inspire ES environmental visualization software.

Calibration service also available

A Certificate of Calibration can be issued upon request. (It is necessary to ship the product back to OMRON.)
To obtain a Certificate of Calibration at time of purchase, please select a type that includes a Certificate of Calibration.
As the sensor head and station are digitally connected, this calibration service is available only for the sensor head.
∗ The calibration service does not include repairs or adjustments.

Available publications
- Calibration Certificate

- Traceability Chart

Monitor an invasion of foreign matter

Differential Pressure Level

Precision measurement of differential pressure inside and outside of clean room or booth.

Differential Pressure Station

ZN-DPX21-SA (Station)　ZN-DPS11-S (Sensor head: 1.5 m type)
ZN-DPS15-S (Sensor head: 10 m type)

−500 to 500 Pa (Accuracy: Within ±3%* of indicated value)

∗ Zero point accuracy: ±0.2 Pa

Ultra wide-range precision measurement

This ensures a range of minus 500 to plus 500 Pa and diffential pressure accuracy of plus/minus 3%. With more accurate differential pressure control, clean room environments can be effectively maintained.

Measurement range
−500 Pa to +500 Pa

Measurement accuracy
Within ±3%* of indicated value
∗ Zero point accuracy: ±0.2 Pa

Built-in hybrid logging engine

Data can be logged to the unit (SD Card) while communicating with PC (or PLC) via LAN. Even in the event of network failure, the unit will continue to record data. Production technology divisions can centrally control management via network while manufacturing floors can localize control using SD cards.

SD Card slot

Easily construct a wide range of control systems

Built-in alarm output makes the station an effective part of all kinds of control systems.

● Positive pressure level alert for clean environments
● Automatic control of air conditioning level based on differential pressure level

Alarm output if the differential pressure is less than the standard.
Indicator light

[Air conditioning systems for clean environments]
● Display of differential pressure trouble alerts
● Optimal eco-friendly air conditioning level in response to differential pressure level

Precision measurement of differential pressure inside and outside of clean room or booth.
Clearly visualize differential pressure shifts at all times.

Big and legible!
Large and easily viewable LCD display with two rows and five characters in each row.

Start recording with a single push of a button.

Sensor head slot

DC cable/ AC adaptor terminal

LAN port

SD Card slot

Alarm output terminal

Easy to hang on wall as well
On the reverse side, there are two types of holes; for wall-hanging and for fixing. Magnets are also available (sold separately).

Thermo-Humidity Station is used at the following places...
Positive pressure control in large-scale clean booths

Contributes to control of positive pressure due to fluctuations in air intake and outtake in the booth and clogging of FFU filters

Control of differential pressure in air shower rooms

Effective for control of positive pressure level in air shower and interlock control after air shower is finished

Simple visualization software available as a standard.

Simple, user-friendly PC software* is available as a standard feature (Station Utility: Setup tool, logging tool, and SD Viewer ES). Unit setup and data logging can be possible via LAN network. Also, logged data can be easily displayed in a waveform graph.

* Download the PC Software Station Utility from the following OMRON website (http://www.fa.omron.co.jp/station-u-e).

With back-up using commercially available AAA batteries, operation continues even during sudden power outage

With built-in battery backup feature, LAN transmission and logging operation won't stop even in the event of power outage or sudden disconnection.

∗ In network mode, operation continues for approximately two hours on batteries alone. However, battery life will vary depending on the measurement environment, battery type, or battery performance.

Manganese batteries cannot be used.

Positive pressure level in a clean booth is easily checked using this Differential Pressure Station.

1 Prepare

Insert a tube into differential pressure sensor head.

Start using immediately upon purchase. Dedicated tube included.

2 Install
With head mounted outside the booth, the hi-side of the tube is inserted in the booth (positive pressure side).

Compact head size makes it easy to mount and measure at any time.

3 Measure

Differential pressure levels inside and outside of the booth are displayed.

Simply turn on and start measuring right away.

Calibration service also available

A Certificate of Calibration can be issued upon request. (It is necessary to ship the product back to OMRON.)
To obtain a Certificate of Calibration at time of purchase, please select a type that includes a Certificate of Calibration.
As the sensor head and station are digitally connected, this calibration service is available only for the sensor head.

Airborne
Particles

Dust Fallout
generated by human body and equipment

Continuously and accurately measures airborne particles.

Air Particle Sensor
Particle measurement type

ZN-PD03-SA

| 0.3 µm | 0.5 µm | 1.0 µm |

Directly measures falling dust that threatens product quality.

Air Particle Sensor
Dust measurement type

ZN-PD50-SA

| 5 (10) µm | 20 (30) µm | 50 µm |

Particle measurement type

Highly accurate measurement comparable to particle counters

A high power suction fan and the internal structure designed to rectify airflow ensure a suction rate of 2.83 ℓ/min.[1] Accuracy is close to purpose-specific particle counters thanks to laser optics design technology that Omron has cultivated with high precision displacement sensors.[2]

Particles are counted by irradiating the incoming airflow with a laser and detecting the scattering light from the particles.

[1] Suction rate detected by particle measuring sensor. Suction rate for dust measuring sensors is 6.0 ℓ/min.

[2] Use the Sensor in a class 1,000 or higher environment. The influence of measurement error will be too large in a class 100 or lower environment. To manage absolute quantities, use a particle counter (a measuring instrument), and use the Sensor to monitor trends.

Dust measurement type

One unit for measuring dust fallout and identifying dust sources

Funnel-shaped intake and powerful suction fan efficiently capture falling dust. Large diameter dust is trapped by a built-in filter. Moreover, trapped dust can be collected using two-sided tape attached inside of the pull-out trap box. The dust can then be analyzed under microscope to identify the source.

Easily detachable filter

Trap box

* The larger the size, the more dust it traps. Some types of dust may penetrate the trap box.

Compact design and reduced maintenance costs

The Sensor is small enough to fit in the palm of your hand, which makes it easy to mount on a wall or other convenient locations. Maintenance costs are also reduced because the product does not use an external pump that would normally require frequent replacement.

Compact size

Dust fallout and airborne particles detract from product quality.
Continuously monitor these two factors to minimize their effects.

Particles (0.5 μm) — Dust (20 μm)
Airborne particles and dust fallout are not correlated due to differences in their behavior.
Therefore, it is necessary to measure both of them separately and accurately.
Putting the particle type on the wall of the room, and the dust type in the vicinity of product processing equipment, is recommended.

Thermo-Humidity Station is used at the following places...

Dust control for secondary battery manufacturing equipment (Dust)

Clean room management in FPD plant (Particles)

∗ If the dust created inside the Sensor is a problem, use a ZN9-PT□-S Exhaust Tube (sold separately).
Monitoring sources of foreign substance in automobile painting process (microparticles)
∗ It cannot be used in explosion-proof painting booths.

Simply turn on and start measuring right away.

Installation is easy since it can be mounted to DIN rail. You can measure anywhere.

Adjustment of particle diameter setting is simple

Wide range of interfaces allow for extension

Inputs and outputs include trigger input, alarm output x 2, and error output, which can be used for a variety of purposes including dust level setting, alarm output, timed measurement, and so forth.

Input/Output terminals
Trigger input
Alarm output x 2
Error output

Triggers can be input to initiate monitoring when necessary and alarms can be output at desired control levels.

Integrated airborne particle sensor and thermo-humidity sensor also available. Achieve your ideal temperature and humidity measurement.

Temperature display
Humidity display
Temperature, humidity and simple dew point can be easily displayed when connected to an Air Particle Sensor∗. And, the unit delivers the highest class of sensing performance. You will benefit from wide measurement ranges and highly accurate humidity measuring.

∗ There are limitations on the particle sensors that can be connected to the Air Thermo Sensor. Please refer to the "Specifications / Performance" information.
The dew point can be handily calculated by using the measured values for temperature and humidity.

Air Thermo Sensor
Temperature and humidity measurement type
ZN-TH11-S

Temperature | Humidity | Simple dew point

Calibration service also available

A Certificate of Calibration can be issued upon request. (It is necessary to ship the product back to OMRON.)
To obtain a Certificate of Calibration at time of purchase, please select a type that includes a Certificate of Calibration.

∗ When a ZN-PD□□-S-series particle sensor is received for the calibration service, parts with a limited service life will be replaced and adjusted before the sensor is returned.
However, it may be determined that the sensor is not repairable due to internal contamination, board corrosion, or other reasons.
If inspection shows that the sensor is not repairable, only a certificate for the inspection results will be issued.
(The same fee as for repairs will apply.)

Specifications

Sensor head

Item	Model		ZN-THS 11-S (Sensor head: 1.5 m type)	ZN-THS 17-S (Sensor head: Anchored type)
Temper- ature	Measurement range		−25 to +60°C	0 to 60°C
	Measurement precision		±0.3°C (at 25°C)	
	Resolution		0.1°C	
Relative humidity	Zero point		0% to 99%	20% to 85%
	Span		±2.5% (at 25°C , 10 to 85%)	
	Resolution		0.1%	
Weight (packaged)			Approx. 300 g	
Accessories			Instruction sheet Mounting screw (M3 x 8) x 1	Instruction sheet Mounting screw (M3 x 8) x 1 Caps to secure cable

• As performance may deteriorate through the adhesion of impurities or contaminants in the environment on the sensor surface, calibration is recommended once a year.
• When ZN-THS1□□-S is exposed over a long period of time at a high humidity of 80% or higher, the humidity measurement value may be offset.
　In that case, expose the product at room temperature and humidity for 24 hours prior to use.
• When ZN-THS1□□-S is transferred rapidly between the places where temperature difference is large, condensation may occur on the sensor surface.
　In that case, the ZN-THS1□□-S may not work properly.
　When the product becomes wet due to condensation, allow the product to dry in dry, room temperature environment before use.
• When using the ZN-THS1□□-S under conditions with temperature of -20°C or less or with humidity of 90% or more, acceleration of sensor deterioration may occur.
• To avoid deterioration of sensor, avoid storing the product under high temperature and high humidity for a long period of time.
• Please don't use the product in the environment to which organic chemistry material disperses.

Station

Item	Model	ZN-THX21-SA
Sensor that can be connected		Thermo-Humidity Sensor Head (ZN-THS□□-S)
Display		LCD 7-segment 5-digit 2-step display, auxiliary information indicator display
Measurement interval		10 s, 20 s, 30 s, 1 min, 2 min, 5 min, 10 min, 20 min, 30 min, 1 h
Calculation function		Instantaneous value, maximum value, minimum value, average value
Operating mode		Network connection mode, sleep mode *1 air particle sensor (ZN-PD□□-S□) connection mode *2
Recording mode		Continue *3, ring *4
Alarm signal output		Output to photocoupler (External power supply: 12 to 24 VDC, Load current: Max. 45 mA) Alarm hold setting is possible. *5
Communications interface		Ethernet (10BASE-T, 100BASE-TX)
Communications protocol		Socket (TCP), original protocol
Internal storage device		Internal memory: Approx. 8,500 data items *6
External storage device		SD card (to save measured values and to save/read set values), Recommended SD card: HMC-SD291 (manufactured by OMRON) *7
Power supply voltage		DC input: 24 VDC ±10% Battery: 2 AAA batteries *8
Battery life *9		Approx. 1 year *9 (sleep mode) Approx. 2 hours *9 (Network connection mode, air particle sensor (ZN-PD□□-SA) connection mode) Measurement interval of 10 minutes (with 2 AAA nickel metal hydride batteries, with SD card not inserted)
Operating temperature range		0 to 60°C
Operating humidity range		20% to 85% (no condensation)
Weight (packaged)		Approx. 500 g
Accessories		Instruction Sheet, Startup Guide, DC cable (straight type), Ferrite core, Alarm output connector *10

*1 Power saving mode. The indicator is always OFF in default setting. (Turns ON with button operation.)
　Network communications with host devices cannot be made.
*2 This mode makes one-to-one network connection with Air Particle Sensor (ZN-PD□□-S□) and enables logging of the particle count value and thermal data simultaneously to the SD card.
　Network communications with host devices cannot be made.
*3 Automatically writes data to the SD card when reaching the upper limit of the internal memory and keeps recording until the capacity limit of the SD card. If the SD card is not inserted when the internal memory reaches the upper limit, recording stops. (Data can be output to the SD card by pressing the button after inserting the SD card.)
*4 This mode always records the latest measured values for the upper limit of the internal memory. (When the measured values exceed the upper limit of the internal memory, the data items will be deleted beginning with the oldest data item.)
*5 An alarm is shown when exceeding the upper limit value or lower limit value that has been set in threshold setting mode.
*6 Air particle sensor connection mode is excluded.
*7 If you use an SD or SDHC card from another manufacturer, you will be able to temporarily read and write data. However, it may become impossible to recognize some cards during operation, and data may be lost. Please use the recommended SD card.
*8 Nickel hydride battery and alkaline battery can be used. Manganese batteries cannot be used.
*9 Battery life differs depending on measurement environment, sampling, operating mode, battery type or performance.
*10 The connector is type XW4B-02B1-H1, made by OMRON.

External Dimensions Tolerance class IT16 applies to the dimensions unless otherwise specified.

Cable length		1.5 m	10 m
Weight (packaged)		Approx. 500 g	
Accessories		Instruction Sheet, air tube 1 m x 2, mounting screw (M3 x 6) x 2	

* For the precision under a rated environment, an offset less than 0.1 Pa/year may occur.
* The accessories tube inside diameter is 4 mm, and the outside diameter is 6 mm.

Station

Item	Model	ZN-DPX21-SA
Sensor that can be connected		Fine differential pressure sensor head (ZN-DPS1□□-S)
Display		LCD 7-segment 5-digit 2-step display, auxiliary information indicator display
Measurement interval		10 s, 20 s, 30 s, 1 min, 2 min, 5 min, 10 min, 20 min, 30 min, 1 h
Calculation function		Instantaneous value, maximum value, minimum value, average value
Operating mode		Network connection mode, sleep mode *1 air particle sensor (ZN-PD□□-S□) connection mode *2
Recording mode		Continue *3, ring *4
Alarm signal output		Output to photocoupler (External power supply: 12 to 24 VDC, Load current: Max. 45 mA) Alarm hold setting is possible. *5
Communications interface		Ethernet (10BASE-T, 100BASE-TX)
Communications protocol		Socket (TCP), original protocol
Internal storage device		Internal memory: Approx. 8,500 data items *6
External storage device		SD card (to save measured values and to save/read set values), Recommended SD card: HMC-SD291 (manufactured by OMRON) *7
Power supply voltage		DC input: 24 VDC±10% Battery: 2 AAA batteries *8
Battery life *9		Approx. 1 year *9 (sleep mode) Approx. 2 hours *9 (Network connection mode, air particle sensor (ZN-PD□□-SA) connection mode) Measurement interval of 10 minutes with 2 AAA nickel metal hydride batteries, with SD card not inserted)
Operating temperature range		0 to 60°C
Operating humidity range		20% to 85% (no condensation)
Weight (packaged)		Approx. 500 g
Accessories		Instruction Sheet, Startup Guide, DC cable (straight type), Ferrite core, Alarm output connector *10

*1 Power saving mode. The indicator is always OFF in default setting. (Turns ON with button operation.) Network communications with host devices cannot be made.
*2 This mode makes a one-to-one network connection with Air Particle Sensor (ZN-PD□□-S□) and enables logging of the particle count value and differential pressure data simultaneously to the SD card. Network communications with host devices cannot be made.
*3 Automatically writes data to the SD card when reaching the upper limit of the internal memory and keeps recording until the capacity limit of the SD card. If the SD card is not inserted when the internal memory reaches the upper limit, recording stops. (Data can be output to the SD card by pressing the button after inserting the SD card.)
*4 This mode always records the latest measured values for the upper limit of the internal memory. (When the measured values exceed the upper limit of the internal memory, the data items will be deleted beginning with the oldest data item.)
*5 An alarm is shown when exceeding the upper limit value or lower limit value that has been set in threshold setting mode.
*6 Air particle sensor connection mode is excluded.
*7 If you use an SD or SDHC card from another manufacturer, you will be able to temporarily read and write data. However, it may become impossible to recognize some cards during operation, and data may be lost. Please use the recommended SD card.
*8 Nickel hydride battery and alkaline battery can be used. Manganese batteries cannot be used.
*9 Battery life differs depending on measurement environment, sampling, operating mode, battery type, or performance.
*10 The connector is type XW4B-02B1-H1, made by OMRON.

External Dimensions   Tolerance class IT16 applies to the dimensions unless otherwise specified.

ZN-DPX21-SA (Unit: mm)

ZN-DPS11-S (Unit: mm)

ZN9-ACP01-S (Unit: mm)

Specifications `Air Particle Sensor`

Ordering Information

■ **Sensor**

Appearance	Item (Measured particle diameter)	Model
	Air Particle Sensor Particle measurement type 0.3, 0.5, or 1.0 μm min.	ZN-PD03-SA
		ZN-PD03C-SA [*1]
		ZN-PD03F-SA [*1][*2]
	Air Particle Sensor Dust measurement type 5 μm (10 μm), 20 μm (30 μm), 50 μm min.	ZN-PD50-SA
		ZN-PD50C-SA [*1]
	Air Thermo Sensor For temperature / humidity measurement	ZN-TH11-S

· Please choose this form when you buy with the calibration certificate.
*1 Contents of Certificate of Calibration Set: Calibration Certificate, Inspection Result (ZN-PD03C-SA: 0.3 μm inspection data, ZN-PD50C-SA: 5 μm inspection data), and Traceability Chart
*2 For the ZN-PD03F-SA, both 0.3 μm and 0.5 μm inspection data will be given in the Inspection Results.

■ **Accessories (Order separately)**

<Air Particle Sensor>

Shape	Item (Applicable Standards)	Rated Voltage	Model
	AC adaptor (PSE)	100 to 125 VAC	ZN9-ACP02-PSE
	AC adaptor (CCC)	100 to 240 VAC	ZN9-ACP02-CCC
	AC adaptor (KC)	100 to 240 VAC	ZN9-ACP02-KC
	AC adaptor (CE)	100 to 240 VAC	ZN9-ACP02-CE
	AC adaptor (UL)	100 to 125 VAC	ZN9-ACP02-UL

Appearance	Item	Model
	Change filter set for Particle measurement type	ZN9-PF1-S
	Change filter set for Dust measurement type	ZN9-PF2-S
	Change funnel for Dust measurement type	ZN9-PG1-S
	Exhaust tube (4 m)	ZN9-PT4-S
	Exhaust tube (8 m)	ZN9-PT8-S
	Filter for cleaning	ZN9-PC1-S
	DC cable (2 m) (ZN9-ED02-S comes with ZN-PD□□-SA) — Straight type	ZN9-ED01-S
	DC cable (2 m) — Right angle type	ZN9-ED02-S

<Air Thermo Sensor>

Appearance	Item	Model
	Connection cable for air particle sensor (With RJ-45 connectors at both ends, length: 0.1 m)	ZN9-TL01-S
	Connection cable for air particle sensor (With RJ-45 connectors at both ends, length: 2 m)	ZN9-TL20-S
	Connection cable for external device (With a RJ-45 connector at one end, length: 2 m)	ZN9-TC20-S

■ **PC Software**

Appearance	Item	Model
	Wave Inspire ES	ZN-SW11-S

* System requirements OS: Windows XP / Windows Vista / Windows 7 (64-bit is supported for Windows 7 alone)
  CPU: compatible Intel processors, 1 GHz or higher.
  Memory: 1 GB or more (2 GB or more recommended)
  The maximum number of connectable sensors is 95.
  (When one PC is connected with a leased line network . The sampling period is set to 10 minutes.)
  The number of possible sensor connections changes by a sampling period, connected number of PC or PLC, and the network load situation.

Specifications

■ **Air Particle Sensor**

Item	Particle measurement type (ZN-PD03-SA)	Dust measurement type (ZN-PD50-SA)
Measurement method	90° sideways light-scattering method	
Light source	Semiconductor laser	
Measured particle diameter	0.3, 0.5, or 1.0 μm min.	5 μm (10 μm), 20μm (30 μm), 50 μm min. [*1]
Counting efficiency	Error of ±30% max. with a standard measuring instrument for 0.3 μm reference particles	Error of ±35% max. with a standard measuring instrument for 0.5 μm reference particles
Particle concentration	0 to 100,000 particles/cf (Recommended application environment: Class 1,000 to 100,000)	0 to 50,000 particles/cf
Sample flow rate	More than 2.8 Liter/min	More than 6.0 Liter/min
Status outputs (2 outputs)	Photocoupler output (Status outputs linked with clean levels)	
System error status output		
Trigger Input	Photocoupler input	
Communications interface	Ethernet (10BASE-T, 100BASE-TX)	
Communications protocol	Socket (TCP), original protocol	
Indicators	Clean Level: 4 steps display according to clean level (adjustable) 7-segment main display (red): Measurement value (For particle count, the three type displays are selectable; particles/cf, particles/liter and particles/measurement time With ZN-TH11-S; temperature, humidity and dew point) 7-segment sub-display (green): Threshold particle diameter, With ZN-TH11-S; t (temperature), rh (humidity), dp (dew point)	
Measure Mode	Real-time mode (by second) / Cycle mode (by set cycle) / Trigger mode (by trigger)	
Power supply voltage	DC 18 V – 25 V AC Adaptor: 100 to 240 V / 50 to 60 Hz [*2]	
Current consumption	1A MAX	
Ambient temperature range	Operating: 0 to 35°C	Operating: 0 to 40°C
	Storage: -15 to 50°C(with no icing or condensation)	
Ambient humidity range	Operating and storage: 35% to 85% (with no icing or condensation)	
Insulation resistance	20 MΩ min. at 500 VDC	
Withstand voltage	1,000 VAC, 50/60 Hz for 1 min	
Vibration resistance	110 to 55 Hz, 0.3 mm double amplitude, 50 min	
Materials	ABS	
Degree of protection	IP20	
Installation method	DIN track mount / Self standing	
Weight (Packed state)	Approx. 1.7 kg	
Accessories	Instruction Sheet, DC cable	
	Air-intake tube (Tubing ID: 10 dia., Length 1 m) ×1	Air filter ×1 Funnel ×1

*1 ( ) is selectable.
*2 AC adaptor is not bundled.

■ **Air Thermo Sensor**

Item		ZN-TH11-S
Supply voltage		12 to 24 VDC ±10% Ripple (p-p): 10% max.
Current consumption		40 mA max.
Temperature	Range	-25 to 60°C
	Measurement accuracy	±0.3°C(at 25°C)
	Resolution	0.1°C
Humidity	Range	0% to 99%
	Measurement accuracy	±2.5% (at 25°C, 10% to 85%)
	Resolution	0.1%
Indicator		Alarm LED on the body
Alarm threshold		Threshold can be set for temperature, humidity or dew point.
Data update cycle		10 s

· Connection cable (Type ZN9-TL□□) is needed to connect with ZN-PD-S.
· After ZN-TH11-S is kept in high humidity environment (more than 80%) for a long time, humidity measurement values might shift (approx +3% with 60 hrs).
  In that case, the ZN-TH11-S needs to be kept in room temperature and humidity for more than 1 day.

Calibration service

| Subject to calibration	Content	Model
Air Particle Sensor Particle measurement type	Calibration Certificate, Inspection Result (0.3 μm inspection data), Traceability chart	ZN9-PD03C-S
	Calibration Certificate, Inspection Results (0.3 μm and 0.5 μm inspection data), and Traceability Chart	ZN9-PD03F-S
Air Particle Sensor Dust measurement type	Calibration Certificate, Inspection Result Traceability chart	ZN9-PD50C-S
Air Thermo Sensor	Calibration Certificate, Inspection Result (5 μm inspection data), Traceability chart	ZN9-TH11C-S

· If a Certificate of Calibration is required after you purchase the sensor head, use the above model number to order one.
· It is necessary to ship the product back to OMRON in Japan.
* When a ZN-PD□□-S-series particle sensor is received for the calibration service, parts with a limited service life will be replaced and adjusted before the sensor is returned.
  However, it may be determined that the sensor is not repairable due to internal contamination, board corrosion, or other reasons. If inspection shows that the sensor is not repairable, only a certificate for the inspection results will be issued. (The same fee as for repairs will apply.)

Read and Understand this Catalog

Please read and understand this catalog before purchasing the product. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

• Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.

• Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.

• Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.
